COURSE TABLE OF CONTENTS

ManageEngine Network Configuration Manager (NCM)

OEM: ManageEngine • Duration: 1 Day (5 hrs)

COURSE MODULES & TOPICS

Module 1: Introduction to NCM

- Overview and features
- Architecture
- Supported devices
- Use cases

Module 2: Installation and Initial Configuration

- System requirements
- Installation steps
- Licensing
- Initial setup
- Prerequisites

Module 3: Device Discovery and Onboarding

- Device discovery
- Adding devices
- Device credentials
- SNMP configuration
- SSH and Telnet setup

Module 4: Configuration Management

- Configuration backup
- Startup and running configurations
- Configuration versions
- Configuration comparison

Module 5: Configuration Change Management

- Managing configuration changes
- Command execution
- Configuration templates
- Change tracking

Module 6: Configuration Compliance Management

- Compliance policies
- Compliance rules
- Configuration standards
- Compliance checks
- Compliance reports

Module 7: Configuration Automation

- Configuration deployment
- Scheduled tasks
- Scripts
- Automation workflows

Module 8: Firmware and Vulnerability Management

- Firmware inventory
- Firmware upgrades
- Vulnerability assessment
- Device lifecycle considerations

Module 9: Reports, Alerts and Administration

- Reports
- Notifications
- Audit trails
- User roles
- Administrative settings

Module 10: Hands-on Lab and Troubleshooting

- Device onboarding
- Configuration backup
- Configuration comparison
- Compliance checks
- Troubleshooting
