

Clarity 15.9.3: Installation with PostgreSQL

Course Code: 33CLR26083

Course Description

In this course, you will learn how to install Clarity 15.9.3 with the PostgreSQL database. You will learn how to configure the database to create tablespaces, roles, and schemas. You will also learn how to import the DB dump.

You will then install and configure Clarity and finally install the PMO Accelerator.

Finally, you will install and configure Jaspersoft.

This course is primarily lab-driven. To learn more about the conceptual information for installing Clarity, you can complete the Clarity 15.9.3 Installation Planning course.

Delivery Method

Instructor-Led

Duration

One Day

Course Objectives

By the completion of this course, you will be able to:

- Configure PostgreSQL
- Install Apache Tomcat
- Install Clarity
- Install and configure Jaspersoft

Hands-On

This course includes practical hands-on exercises that will enable you to configure PostgreSQL, install Clarity, and install Jaspersoft.

Prerequisites

- Clarity 15.9.3 Installation Planning
- Basic knowledge of Windows operating system
- Basic knowledge of databases

Additional Courses Available

- CA PPM 15.5: Reporting Administration 200
 - CA PPM 15.3: Process Management 200
 - CA PPM 15.4: Ad Hoc Views, Reports, and Dashboards 20
-

Course Outline

Module 1: Introduction

- Overview of Clarity Installation
- Create the Clarity Database
- Create the DWH Database
- Create the Jaspersoft Database

Module 2: Install Clarity

- Clarity Installation Process
- Extract Java and Apache Tomcat
- Setup environment variables
- Install Clarity

Module 3: Clarity Configuration

- Overview of CSA
- Configure Database Server properties
- Configure Data warehouse properties
- Install CSK

Module 4: Jaspersoft Installation and Configuration

- Install Jaspersoft
 - Verify Jaspersoft installation
-
