Restricted Rights Notice

If this documentation is delivered to the United States Government or anyone using the documentation on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

Trademark Notice

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. Table of Contents

Lesson 01 - Managing Orders Using the Task Web Client	12
Objectives	13
Task Web Client	14
What Is an Order?	15
OSM Orders	16
Fixed OSM Order Header Properties	17
Extended OSM Order Header Properties	18
Creating a New Order	19
Supplying the Order Data	20
Copying an Order	21
Workstream process	22
Task Web Client Worklist	23
Executing a Task in the Worklist	25
Previewing Orders	31
Further Task Web Client functionality	32
Remarks and Attachments	33
Adding Remarks and Attachments	34
Editing Multiple Instances of Data	35
Process History	36
Displaying the Process History	37
Pie and Gantt Chart	38
Changing State or Status	39
Generating Reports	41
Generating Reports	42
Summary	43
Key Task Web Client Terms	44
Lesson 02 - Design Studio	46
Objectives	47
Design Studio	48
Eclipse Platform	49
Workbench	50
Workspaces	51
Resources	52

Views	53
Perspectives	54
Design Studio Perspectives	56
Cartridge View	57
Data Element View	58
Studio Design Editors	59
Navigating within projects	60
Solution View	61
Relation Graph View	62
Studio Environment Perspective	63
Cartridge Management View	64
Setting OSM Preferences	65
Design Studio Help	67
Context-Sensitive Help	68
Summary	69
Lesson 03 - Static Processes	70
Objectives	71
Order Creation and Recognition Order submission. How to create orders in OSM?	72
Order Creation and Recognition Message structure	73
Order Creation and Recognition Order Recognition Rule	74
Order Creation and Recognition Order Recognition Rule	76
Order Creation and Recognition Order Recognition Rule. Transformation	77
Order Creation and Recognition Order Recognition Rule. XQueries	79
Order Creation and Recognition Order Recognition Rule. Order Data Transformation Rule	80
Order Creation and Recognition Order Recognition Rule. Validation failure	81
Order Creation and Recognition Order Recognition Rule. Recognition failure	82
Basic Process Configuration Model the desired Process Flow	83
Basic Process Configuration Design the Process Flow	84
Basic Process Configuration Configure the Design Studio project	85
Basic Process Configuration Design Studio. Create a New Project	86
Basic Process Configuration Design Studio. Create Data Definitions	87
Basic Process Configuration Design Studio. Order and Order Template	88
Basic Process Configuration Design Studio. Roles	89
Basic Process Configuration Design Studio. Process Flow: Tasks	90
Basic Process Configuration Design Studio. Process Flow: Configuration	92
Basic Process Configuration Design Studio. Process Flow: Rule Tasks	93

Basic Process Configuration Design Studio. Creation Task	94
Basic Process Configuration Design Studio. Lifecycle Policy	95
Basic Process Configuration Design Studio. Order Attributes and Permissions	96
Basic Process Configuration Build the Project	97
Lesson 04 - Enhancing the Process Flow	98
Objectives	99
Enhancing process flows	100
Adding a sub-process to a process	102
Support for multiple entity instances	103
Configuring multiple instances	104
Displaying multiple instances	105
Configuring a multi-instance task	106
Executing multi-instance tasks	107
Configuring a multi-instance sub-process	108
Configuring conditional processing	110
Rule tasks	111
Using rule tasks	112
Timer delay tasks	113
Event delay tasks	114
Comparison of conditional tasks	115
Lesson 05 - Enhancing the User Interface	116
Enhancing User Interface	116
Objectives	117
Task User Interface Manual Task Assignment	118
Task User Interface Behaviors	119
Task User Interface Behaviors. Relevant Task.....	120
User Interface Behaviors. Read Only Task	121
User Interface Behaviors. Calculation Task	122
User Interface Behaviors. Constraint Task	123
User Interface Behaviors. Information Task	124
User Interface Behaviors. Style	125
Task User Interface Behaviors. Events	126
Data Instance and Lookup behaviors	127
Creating an Inline Data Instance	128
Data Providers	129
Configuring a Data Provider	130

Association to the Data Instance	131
Drop-down list with a Lookup Behavior	132
Alternate representation (radio button)	134
Survey of Data Providers	135
Inheritance of behaviors	136
Flexible Header fields	138
Using Flexible Header Fields	139
Visibility filters	140
Query Tasks	141
Lesson 06 - Automations Overview	142
Automations Overview	142
Objectives	143
Looking at Automations	144
Automation framework	145
Automation plug-ins	146
Automation Framework and Plugins	147
Automation Types	148
Automation Plugins Summary	150
Automation Framework and Plugins	151
Automation Plugins	152
Automation Contexts	153
Automation data	154
Automation Contexts	155
Predefined Automation Plugins	156
Custom Automation Plugins	157
Custom Automation Plugins Compilation	159
Dispatching modes	161
Lesson 07 - Integration Patterns	166
Integration Patterns	166
Objectives	167
Provisioning Scenario	168
Manual to automated transformation	169
Manual/Automated Tasks	170
Sample Automation Examples	171
Manual/Automated Tasks	173
Integration Pattern	174

Automation Configuration	178
External event receivers and queues	179
Correlation	180
Provisioning Scenario	181
Automation and Middleware	182
Activation Tasks	184
Lesson 08 - External Interactions	186
Automation External Interactions	186
Objectives	187
Simple Synchronous Communication Example	188
Interaction with External Systems Sender: Request message	189
Simple Xquery example Common Definitions	193
Simple Xquery example Input and Output data	194
Simple Xquery example Creating the Payload	195
Simple Xquery example Creating the Payload: header properties	196
Simple Xquery example Creating the Payload: Exception Handling	198
Interaction with External Systems Example of a Request message	199
Interaction with External Systems Automator: Response receiver	200
Interaction with external systems Considerations for the message selector	202
Interaction with External Systems Automator: Response receiver	203
Interaction with External Systems Automator: Customizing the Correlation ID	204
Interaction with External Systems Automator: Response receiver	205
Interaction with external systems Correlation Management	206
Interaction with External Systems Automator: Customizing the Correlation ID	209
Correlation Management	210
Lesson 09 - Internal Interactions	212
Automation Internal Interactions	212
Objectives	213
Interacting with orders in OSM	214
XML API Interactions	215
XML API request message format	216
XML API response message format	217
Internal interactions within automations	218
Internal interactions within automations	219
Namespace and variable declaration	220
Accepting a message and getting basic data	221

Locking the order and getting task data	222
Getting the line items in scope	223
Updating the task status	224
Correlation in separate receiver task Xquery Example	225
Order updates through the XML API	226
UpdateOrder.Request examples	228
Order management states	230
Lesson 10 - Notifications	232
Automation Notifications	232
Objectives	233
Notification sources	234
Custom notifications	235
Task status example	237
Status-based notification Properties	238
Status-based notification Event details	239
Status-based notification Notify roles list	240
Automation Plug-in Type and details	241
Automation Plug-in XQuery Sender configuration	242
Automation Plug-in Routing configuration	243
Building the notification message	244
Building the notification message Returning the output message	245
Building the notification message Getting relevant data to notify	246
Building the notification message Returning the output message	247
Other notification types	248
Process-specific task event notification	249
Process-specific task event notification Event details	251
Process-specific task event notification Rule definition	252
Process-specific task event notification	253
Order event notifications	254
Jeopardy notifications	257
Configuring Jeopardy notifications Specifying conditions for a task	258
Configuring Jeopardy notifications Specifying conditions for an order	259
Configuring Jeopardy notifications Specifying polling interval	260
Notifications in the Task Web client	261
Acknowledging notifications	262
Managing notifications	263

Lesson 11 - Order Orchestration Overview	264
Order Orchestration Overview	264
Modeling Entities	265
An order orchestration scenario A first-time purchase order	266
First time purchase order Order creation	267
First time purchase order Service selection	268
First time purchase order Order submission	269
First time purchase order Order recognition	270
First time purchase order Order line recognition	271
First time purchase order Fulfillment Pattern	272
First time purchase order Decomposition for fulfillment function	276
First time purchase order Decomposition for processing granularity	278
First time purchase order Decomposition for fulfillment function	279
First time purchase order Decomposition for fulfillment provider	280
First time purchase order Decomposition for processing granularity	281
First time purchase order Decomposition for fulfillment function	282
First time purchase order Decomposition for fulfillment provider	283
First time purchase order Decomposition for processing granularity	284
First time purchase order Decomposition Graph	285
First time purchase order Orchestration Plan Building	286
First time purchase order Orchestration Plan Execution	287
First time purchase order Status updates	288
OSM Orchestration Components	290
OSM Orchestration Components Order Request Processor	291
OSM Orchestration Components Orchestration Plan Generation	292
OSM Orchestration Components Orchestration Plan Execution	293
Central Order Management	294
Lesson 12 - Receiving Sales Orders	296
Receiving Sales Orders	296
Order orchestration scenario A first time purchase order	297
Central Order Management Order	298
Inbound Message	299
Order Line Structure	300
Order Line Structure Configuration	301
Order Line Relationships	302
Related Order Lines	303

Related Order Lines in Other Orders	304
Orchestration Flow	305
Modeling Entities	306
Lesson 13 - Order Item Specification	308
Order Item Specification	308
Orchestration Flow	309
Order Item Specification	310
Order Item Properties	311
Key Order Item Properties	312
Order Item Property XQuery Expression	313
XML Data Type	316
Order Item Specification Template	317
Order Item Properties: ControlData	318
Order Item Properties: Data	320
Order Data example	321
Structured Order Item Properties	322
Physical Data Hierarchy	323
Order Item Hierarchies	324
Multiple Order Item Hierarchies	325
Modeling Entities	326
Lesson 14 - Building Orchestration Plans	328
Building Orchestration Plans	328
Orchestration Flow	329
Process-Based Order	330
Orchestration Order	331
The Orchestration Plan generation	332
Orchestration Plan	333
Orchestration Plan: Order Items	334
Orchestration Plan: Order Components	335
Orchestration Plan Generation	336
Orchestration Process	337
Orchestration Sequence	338
Selecting Order Items	339
Order Item Selector	340
Modeling Entities	341
Lesson 15 - Building Fulfillment Patterns	342

Building Fulfillment Patterns 342

Orchestration Flow 343

Fulfilment Pattern 344

Fulfillment Mode 345

Defining Fulfillment Modes 346

Calculating Fulfillment Mode 347

Functions in a Fulfillment Pattern 348

Fulfillment Function Order Component 349

Defining a Function Order Component 350

Defining Fulfillment Modes 351

Order Component Order Template 352

Order Component Control Data 353

Selecting Data from a Data Schema 354

Drag & Drop from Data Element View 355

Fulfillment Function Process Data 356

Review: Orchestration Fulfillment Pattern 357

Defining a Fulfillment Pattern 358

Defining Function Order Components 359

Decomposing Order Items 360

Refining Order Item Selection 361

Refining the Fulfillment Pattern 362

Defining Dependencies 363

Dependency Relation Graph 364

Modeling Entities 365

Putting it together 366

About Inheritance 367
