

SailPoint IdentityIQ Basics

Summary

This course provides an overview of IdentityIQ, SailPoint's on-premises identity and Access management solution. It's designed for everyone looking to gain a basic understanding of IdentityIQ's capabilities. It's also the foundation for technical personnel who will go on to learn the details of implementing or administering IdentityIQ in additional SailPoint courses.

Audience

- Anyone looking to gain a basic understanding of the features and capabilities of IdentityIQ.

Prerequisites

- None

Duration

- 10 Hours

Table of Contents

Module 1: Introduction to IdentityIQ

- Overview of IdentityIQ and its key features
- Benefits of using IdentityIQ for identity and access management
- Understanding the core components of IdentityIQ (e.g., Identity Store, Provisioning Engine, Access Management)

Module 2: Identity Management Fundamentals

- Concepts of identities, attributes, and entitlements
- Creating and managing user and group accounts
- Understanding the role of directories and their integration with IdentityIQ

Module 3: Access Management Concepts

- Principles of access control and authorization
- Role-based access control (RBAC) and its implementation in IdentityIQ
- Creating and managing roles and permissions

Module 4: Provisioning and De-provisioning

- Overview of the provisioning process
- Integrating IdentityIQ with target systems (e.g., HR systems, applications)
- Understanding de-provisioning and its best practices

Module 5: Identity Lifecycle Management

- Managing user lifecycle events (e.g., onboarding, offboarding, changes)

- Implementing password policies and reset processes
- Ensuring data privacy and compliance

Module 6: IdentityIQ Administration

- Configuring IdentityIQ settings and parameters
- Managing user interfaces and customizations
- Troubleshooting and resolving common issues

Module 7: Integrating IdentityIQ with Other Systems

- Connecting IdentityIQ to external systems (e.g., SSO providers, LDAP directories)
- Using APIs and connectors for integration and Identity Management
