

" PRINCE2 Agile Foundation (Version 2)"

Course Introduction

The **PRINCE2 Agile Foundation (Version 2)** course is a four-day program designed to equip participants with a clear understanding of how to blend the structure and governance of PRINCE2 with the flexibility and responsiveness of Agile delivery. It introduces the Agile mindset, principles, and techniques, and shows how these align with PRINCE2's processes, themes, and roles to enable effective project delivery in dynamic environments. Through practical examples, discussions, and exercises, participants learn how to tailor PRINCE2 controls for Agile contexts, manage changing requirements, and foster collaboration between business and delivery teams. By the end of the course, learners will be well-prepared to apply PRINCE2 Agile principles in real-world projects and confidently sit for the PRINCE2 Agile Foundation certification exam.

Day 1 – Agile and PRINCE2 Fundamentals

Focus: Building core Agile understanding and linking it to project management principles.

Sessions:

- **Introductions and Course Overview**
