- Receiving and Transferring Inventory
 - Counting and Shipping for Customer Orders
 - Overview of MM Transactions
-

Day 13 – Materials Management (MM) – Advanced

- Inventory Master Data
 - Inventory Transaction Processing
 - Physical Inventory Procedures
-

Day 14 – Troubleshooting

- End-to-End Business Flow: Procurement → MRP → COM
 - Cross-Module Data Dependencies
-

Day 15 – Integration Concepts

- Revision of Key Topics
 - Functional Assessment Preparation
-

Day 16 – System Review & Assessments

- AS400 File and Field Explanation for Each Module
-

Day 17 – AS400 MAPICS Menu (COM)

- AS400 File and Field Explanation
- COM Menu Access

- CA Menus and U Jobs
-

Day 18 – AS400 CAS Menu Overview

- AS400 File and Field Explanation for Each Module
-

Day 19 – Inventory Management (IM)

- Overview of MRP Cycle
 - Backend Files and Key Fields
 - Demand Management
 - Planning Run Options
-

Day 20 – Inventory Management (IM) – Menu & Inquiry Options

- Item Availability and Balance History
 - Purchase Order Inquiries
 - Location Detail by Item/Warehouse
 - Warehouse Summary by Item
 - Item Detail by Location
-

Day 21 – Inventory Management (IM) – Detailed Inquiries

- Display Item Detail
 - Item Balance Detail Across Warehouses
 - Manufacturing Allocations
 - Open Orders by Item and Warehouse
-

Day 22 – Primary Business Object Explanation

- Overview of Core Business Objects
- Role of Primary Business Objects in XA
- Relationship with Operational and Transactional Data

Day 23 – Material Requirements Planning (MRP)

- Standard vs Custom Objects
- Identifying Customizations in XA
- Functional Impact of Custom Changes

Day 24 – Planning & Material Management Menu Options (Part 1)

- Planning Run Execution Options
- Planning Run Reports
- Initiating Planning Runs

Day 25 – Planning & Material Management Menu Options (Part 2)

- Maintain Horizon Values
- Maintain Period Intervals
- Work with Warehouses

Day 26 – Purchase Menu Options Explanation

- Quotation and Contract Processing
- Requisition Entry and Approval
- Purchase Order Entry, Modification, and Cancellation
- Purchase Order Item and Routing Generation

Day 27 – Procurement Management (PM)

- Requisition Creation
 - Vendor Management
 - Request for Quotation (RFQ)
 - Purchase Order Lifecycle
-

Day 28 – Customization Overview

- Issue Analysis in MRP, PM, and COM
 - Data Flow Validation
 - Common Support Use Cases
 - Case Studies and Flow Tracing
-

Day 29 – Procurement Management (PM) – Advanced

- Master Data (Items, Vendors, Warehouses, Buyers)
 - Purchasing Transactions and History
 - Receiving Operations
 - Procurement Security and Information Flow
-

Day 30 – System Link Process

- System Link Process Explanation
- Business Object and User Exit Explanation
- Card Subsets
- Power Link Setup and Debugging
- Operational Tasks for Running Power Link with AS400

Operation task to Up and running the power link and Debug Explanation from power link to as400

Post-Training Evaluation

- Final assessment after completion of training
- Evaluation of functional and system knowledge
- Feedback and readiness assessment
