Restricted Rights Notice

If this documentation is delivered to the United States Government or anyone using the documentation on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

Trademark Notice

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

Third-Party Content, Products, and Services Disclaimer

This documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Table of Contents

- Lesson 1: Course Introduction** **9**
 - Course Topics 10
 - Course Lessons 11
- Lesson 2: Foundations of OCI** **12**
 - Objectives 13
 - Complete Cloud Infrastructure Platform 14
 - OCI Architecture 16
 - Each OCI Region Comprises Three Availability Domains 17
 - Avoid Single Points of Failure 18
 - OCI Identity Concepts 19
 - Resources 20
 - Compartment 21
 - Resource Compartments 22
 - Compartments Access 23
 - Interaction of Resources 24
 - Multiple Regions 26
 - Nested Compartments 27
 - Set Quotas and Budgets on Compartments 28
 - Flexible Shapes 30
 - Leverage Choice of Processors 32
 - How to identify an OCI resource 33
 - Example OCIDs 35
 - Creating an Instance in OCI 36

Storage Requirements	37
OCI Storage Services	38
Summary	39
Lesson 3: Introduction to Oracle Linux	40
Objectives	41
Linux Architecture, Kernel, and OCI Cloud Shell, Linux OS Architecture	43
Oracle Cloud Shell	44
OCI Cloud Shell Connection	45
Linux File System	46
Linux File System Is Hierarchical	47
File Listing Explained	48
Linux Hosts in OCI	49
Accessing Linux Host in OCI	50
Direct Access by IP Address	51
Indirect Access Through a Bastion Jump Host	52
VIM Editor	53
VIM Editor at a Glance	54
Working with the VIM Editor	55
Steps to Create a Script	56
Manage Users and Groups	57
How to Create and Manage Users and Groups?	58
User and Group Management Command-Line Tools	59
Summary	60
Lesson 4: Operating System Management	61
Objectives	62

Enabling OCI Utilities	63
OCI Utilities	64
Validating OCI Utilities	65
Configuring OCI Utilities	66
Use Cases for OCI Utilities	67
OS Management	68
OS Management Ease of Use	69
Accessing OS Management	70
OS Management Simplifies Updating and Patching	71
Group Instances with the Same OS	72
Manage Linux OS Compliance	73
How to Check OS Security Compliance?	74
Prerequisites to Run a Compliance Report	75
Prepare OS Management Agent	76
Using OS Security Compliance Report	77
Running a Compliance Report	78
Sample Compliance Report Output	79
Summary	80
Lesson 5: Patching and GUI Configuration	81
Objectives	82
Patching with Ksplice	83
Zero Downtime Security Patching with Ksplice	84
Dedicated OCI Ksplice Resources	85
Enabling GUI and Configuring VNC Access	86
GUI on OCI Linux Instance Use Cases	87
Install Linux Services for GUI	88

Configure VNC for the opc User	89
Configure VNC Server Properties	90
Welcome to Linux Desktop!	91
Optional: Enable Unsecure VNC Access – No Traffic Encryption	92
Summary	93
Lesson 6: Managing iSCSI and OCFS Storage	94
Objectives	95
OCI Utilities for iSCSI Storage Management	96
Managing iSCSI Volumes	97
Prepare to Use iSCSI Utilities	98
Sample iSCSI Commands	99
Configure iSCSI Target	100
iSCSI Target and Initiator Topology	101
Prepare an iSCSI Target and Initiator Hosts	102
Configuring the iSCSI Target Instance	103
Perform targetcli Tool Setup	104
Using the targetcli Tool	105
Disable Authentication Requirement	106
Complete iSCSI Target Configuration	107
Configure iSCSI Initiator	108
Configuring an iSCSI Initiator Instance	109
Complete the iSCSI Initiator Configuration	110
Connect and Use iSCSI Share	111
Configure and Test OCFS Cluster	112
What Is Oracle Cluster File System Version 2?	113
OCFS2 Topology Example	114

Set Up an OCFS2 Cluster	115
Configure OCFS2 Cluster Members	116
Repeat on Each Cluster Node	117
Prepare and Mount Shared Volume – First Node	118
Set Up Oracle Linux Storage Appliance	119
Setting Up an Oracle Storage Appliance Instance	120
Install an Oracle Linux Storage Appliance Instance	121
Open Firewall Ports to Access the Storage Appliance	122
VCN Stateful Ingress Rules for Storage Appliance Access	123
Configure Oracle Linux Storage Appliance	124
Configure an Oracle Linux Appliance Instance	125
Repeat For Each Added Block Volume	126
Create Storage Pool	127
Appliance Web Console	128
Linux Appliance Administration Controls	129
Manage Shared File Systems	130
Using NFS Share by Client	131
Monitor Appliance and Shares	132
Summary	133
Course Summary	134
