

# Introducing SAP Cloud Identity Services

---

## Course Description:

This learning journey guides you through the functionalities offered by SAP Cloud Identity Services, including Identity Authentication Service (IAS) and Identity Provisioning Service (IPS). Designed for those new to SAP's security capabilities, the course provides insights into authentication and user provisioning across SAP Business Technology Platform (BTP), helping you build foundational knowledge and hands-on skills.

---

## Audience Profile:

- Consultants
  - Administrators
- 

## Prerequisites:

### Recommended:

- Knowledge of JSON syntax
  - Basic understanding of network and web security concepts
  - Basic understanding of LDAP structures
  - Completion of "Discovering SAP Business Technology Platform"
- 

## Course Objective:

By the end of this course, learners will be able to:

- Navigate and manage global accounts and subaccounts within SAP BTP
  - Explore and configure the SAP Cloud Identity Services UI
  - Understand and customize authentication and login processes
  - Grasp core concepts of Identity Provisioning
  - Set up and manage provisioning entities, system types, and transformations
  - Operate IPS as an administrator, managing source/target systems and provisioning jobs
-

## **Table of Contents (TOC):**

### **Introducing Identity Authentication Services**

#### **Unit 1: Introducing the SAP BTP**

- Explore Global Accounts
- Understanding Organizations and Spaces
- Explaining Global Accounts and Subaccounts
- Managing the BTP Accounts

#### **Unit 2: Introducing the Cloud Identity Services**

- Exploring Cloud Identity Services UI
- Understanding Security Options
- Exploring the Identity Authentication Service
- Customizing the Login Process

---

### **Introducing Identity Provisioning Services**

#### **Unit 1: Introducing Identity Provisioning**

- Exploring Identity Provisioning
- Knowing the Infrastructure

#### **Unit 2: Understanding Identity Provisioning Concepts**

- Configuring the Required Provisioning Entities
- Understanding System Types
- Knowing the Transformation

#### **Unit 3: Setting Up Operations as an Administrator**

- Identifying Provisioning Services Operations
- Managing Entities
