

XML & JSON5 & IntelliJ Training

Duration 5 Days

Table of Contents:

1. Training Overview

1.1. Training Objectives

1.2. Agenda Overview

1.3. Participant Introductions

2. XML Fundamentals and Parsing with Java

2.1. Introduction to XML

2.1.1. What is XML?

2.1.2. XML Structure and Syntax

2.1.3. Common XML Use Cases

2.2. Parsing XML with Java

2.2.1. Java Libraries for XML Parsing

2.2.2. SAX vs. DOM Parsing

2.2.3. Parsing Example: Reading XML Data with Java

2.2.4. Exercise: Write a Java Program to Parse XML

2.3. Advanced XML Topics

2.3.1. XML Namespaces

2.3.2. XML Schema Definition (XSD)

2.3.3. Working with XPath

2.4. Wrap-Up and Q&A

3. Day 2: JSON5 Fundamentals and Parsing with Java

3.1. Introduction to JSON5

3.1.1. What is JSON5?

3.1.2. JSON5 vs. JSON: Differences and Benefits

3.1.3. Common JSON5 Use Cases

3.2. Parsing JSON5 with Java

3.2.1. Java Libraries for JSON Parsing

3.2.2. Parsing Example: Reading JSON5 Data with Java

3.2.3. Exercise: Write a Java Program to Parse JSON5

3.3. Advanced JSON5 Topics

3.3.1. JSON5 Syntax and Data Types

3.3.2. Using JSON Schema with JSON5

3.3.3. Working with JSON5 in Web Applications

3.4. Wrap-Up and Q&A

4. : Working with IntelliJ IDEA

4.1. Introduction to IntelliJ IDEA

4.1.1. Overview and Key Features

4.1.2. Setting Up IntelliJ IDEA for Java Development

4.2. Developing Java Projects in IntelliJ

4.2.1. Creating a New Project

4.2.2. Working with Java Files and Modules

4.2.3. Building and Running Java Projects

4.3. Debugging and Troubleshooting in IntelliJ

4.3.1. Using Breakpoints

4.3.2. Inspecting Variables and the Call Stack

4.3.3. Common Debugging Techniques

4.4. Advanced IntelliJ Features

4.4.1. Code Refactoring

4.4.2. Integration with Version Control Systems (e.g., Git)

4.4.3. Customizing IntelliJ Settings

4.5. Wrap-Up and Q&A

5. Conclusion and Next Steps

5.1. Review of Key Concepts

5.2. Additional Resources and Further Learning

5.3. Feedback and Closing Remarks
