

DW-370: Implement Security Copilot across MS Security Workloads

Get Started with Microsoft Security Copilot

Module 1: Introduction to Microsoft Security Copilot

- Overview of Microsoft Security Copilot
- How Microsoft Security Copilot Works
- Security Copilot Requirements and Licensing
- Pricing and Deployment Considerations
- Role of Security Copilot in Modern Security Operations
- Standalone vs Embedded Security Copilot Experiences
- Responsible AI and Data Handling in Security Copilot

Securing and Expanding Capabilities of Security Copilot

Module 2: Authentication, Prompting, and Extensibility

- Authentication and Access Control for Security Copilot
- Introduction to Prompting in Security Copilot
- Building and Using Promptbooks
- Best Practices for Effective Prompting
- Extending Security Copilot with Plugins
- Using Connectors to Integrate External Data Sources
- Sample Security Use Cases and Scenarios

Security Copilot – Integrations

Module 3: Integrations and Advanced Capabilities

- Overview of Security Copilot Integrations
- Integration with Microsoft Security Solutions
- Advanced Capabilities with Data Security Posture Management (DSPM)
- Using Preview Plugins: Azure AI Search
- Using Preview Plugins: Azure Firewall
- Using Preview Plugins: Web Application Firewall (WAF)
- Using Preview Plugins: Microsoft Sentinel
