## 1 Introduction

- Your Education Center 1-2
- Electronic Sign-In 1-3
- Introductions 1-4
- Course Objectives 1-5
- Course Agenda 1-6

## 2 Oracle AIA and Order to Cash Pre-built Integration: Overview

- Objectives 2-2
- Order to Cash Business Process: Key Communications Industry Challenges 2-3
- Order to Cash Business Process: Key Offer Design Challenges 2-4
- Order to Cash Business Process: Key Offer Delivery Challenges 2-5
- Oracle AIA: Overview 2-6
- Oracle AIA: Pre-Built Integrations for Communications 2-8
- Oracle AIA: Service Oriented Architecture (SOA) 2-9
- Order to Cash Pre-Built Integration: Overview 2-11
- Order to Cash Pre-Built Integration: Integration Packs 2-12
- Oracle Communications Order to Cash Pre-Built Integration: Installation Options 2-13
- Order to Cash Siebel CRM and BRM Pre-Built Integration Installation Options: Functionality 2-14
- Order to Cash Pre-Built Integration: Process Integrations 2-15
- Order to Cash Pre-Built Integration: Process Integration Flows 2-16
- Order to Cash Pre-Built Integration: Siebel CRM and OSM Business Flows 2-17
- Order to Cash Pre-Built Integration: Product Lifecycle Management Business Flow 2-18
- Order to Cash Pre-Built Integration: Order Lifecycle Management Business Flows 2-19
- Order to Cash Pre-Built Integration: Order Fallout Management Business Flows 2-21
- Order to Cash Pre-Built Integration: Architecture 2-22
- Order to Cash Pre-Built Integration Application Role: Siebel CRM 2-23
- Order to Cash Pre-Built Integration Application Role: OSM 2-24
- Order to Cash Siebel CRM and BRM Pre-Built Integration Option: Business Benefits 2-26

Summary 2-27

Quiz 2-28

### **3 Design Time Configuration**

Objectives 3-2

OLM and OFM: Design Time Configuration Overview 3-3

Configuring Siebel CRM for OLM 3-4

Configuring Siebel CRM for OFM 3-6

Configuring OSM 3-7

Configuring BRM 3-8

Configuring Oracle Fusion Middleware 3-9

Configuring Oracle AIA for OLM 3-10

Configuring Oracle AIA for OFM 3-11

Setting Properties in the AIAConfigurationProperties.xml File 3-12

Setting the Standard Properties in the AIAConfigurationProperties.xml File 3-13

Setting the AIAConfigurationProperties.xml File Properties for OLM 3-14

Setting the AIAConfigurationProperties.xml File Properties for OLM Services 3-15

Configuring Domain Value Maps (DVMs): Overview 3-16

Configuring DVMs for OLM 3-17

Sales Order Status DVM 3-19

Configuring Cross-References: Overview 3-20

Configuring Cross References for OLM 3-21

Delivered Routing Rules 3-23

Integration Points 3-24

Summary 3-25

Quiz 3-26

Practice 3: Verifying the Installation 3-30

### **4 Orders and Order Processing**

Objectives 4-2

Product Offerings 4-3

Product Model and Mapping 4-4

Oracle Communications Order and Service Management (OSM) Mandatory Attribute Mappings 4-5

Order Line-to-Product Specification Mapping 4-6

Mapping Customer Order Lines to Fulfillment Flows 4-7

Introduction to Orders 4-8

Orders 4-9

Order Components 4-10

Order Types 4-11

New Order 4-12

- First-Time Purchase Order 4-13
- Change Order 4-14
- Revision Order 4-15
- Follow-On Order 4-16
- Future-Dated Order 4-17
- Cancel Order 4-18
- Order Processing 4-19
- Order Capture: Overview 4-20
- Order Capture: Functional Flow 4-21
- Order Capture: Fulfillment Modes 4-23
- Qualify Order Subflow: TSQ 4-24
- Qualify Order Subflow: Functional Flow 4-25
- Deliver Order Subflow: Fulfillment Processing 4-26
- Deliver Order Subflow: Functional Flow 4-27
- Order Priority 4-29
- Cross-Order Dependencies 4-30
- Order Status Management 4-31
- Order Status Attributes 4-32
- Adding Extra Order Status Attribute Values 4-33
- Preserving Order Status Attribute Values 4-34
- Optimizing Order Status Change Propagation 4-35
- Status Attribute Design: Guidance Summary 4-36
- Summary 4-37
- Quiz 4-38

## **5 Billing Features**

- Objectives 5-2
- Balance Groups 5-3
- Balance Groups: Concepts 5-4
- Service-Level Balance Groups: Functionality 5-5
- Service-Level Balance Groups: Configuration 5-6
- Service-Level Balance Groups: Methodology 5-7
- Service-Level Balance Groups: Tracking Services Separately at Run Time 5-8
- Service-Level Balance Groups: Multiple Billing Profiles at Run Time 5-9
- Service-Level Balance Groups: Service Transfer at Run Time 5-10
- Service-Level Balance Groups: Example of Service Transfer at Run Time 5-11
- Single-Phase Billing 5-13
- Two-Phase Billing 5-14
- Supporting Single Phase and Two-Phase Billing 5-15
- When to Use Single-Phase Billing 5-16
- When to Use Two-Phase Billing 5-17

Time-Based Offerings 5-18  
When a Time-Based Offering Is Purchased in an Order 5-19  
Friends and Family 5-20  
Promotion on Invoice 5-21  
One-Time or Penalty Charges 5-22  
Summary 5-24  
Quiz 5-25

## **6 Order Lifecycle Management (OLM): Overview**

Objectives 6-2  
Order Lifecycle Management 6-3  
Order Lifecycle Management: Methodology 6-4  
Order Lifecycle Management: Functional Flow 6-5  
OLM Business Flows 6-7  
Use Case: Overview 6-8  
Use Case: Create Account 6-9  
Use Case: Select Promotions 6-10  
Use Case: Order Capture 6-11  
Use Case: Account Synchronization 6-12  
Use Case: Billing Synchronization 6-13  
Use Case: Balance Groups 6-14  
Use Case: Cross-References 6-15  
Summary 6-16  
Quiz 6-17

## **7 “Query Product Classes” Business Flow**

Objectives 7-2  
“Query Product Classes” Business Flow 7-3  
Overview 7-4  
High-Level Tasks 7-5  
All Tasks 7-7  
Siebel CRM Product Administrator Tasks 7-8  
Design Studio Cartridge Developer Tasks 7-9  
Querying Product Classes from Design Studio 7-10  
Querying Product Classes and Associated Attributes from Design Studio 7-11  
Effective Dates at Design Time 7-12  
Effective Dates at Run Time 7-13  
Business Flow Implementation: Overview 7-14  
Resources Used: Siebel CRM Services 7-15  
Resources Used: Industry Oracle AIA Components 7-16  
Services Provided 7-17

QueryProdClassAndAttributesSCEReqCommsABCImpl 7-18  
QueryClassificationListSiebelCommsProvABCImpl 7-19  
QuerySpecificationListSiebelCommsProvABCImpl 7-20  
QuerySpecificationValueSetListSiebelCommsProvABCImpl 7-21  
Implementation Flow 7-22  
Summary 7-23  
Quiz 7-24  
Practice 7: “Query Product Classes” Business Flow 7-28

## **8 “Process Sales Order Fulfillment” Business Flow**

Objectives 8-2  
Overview 8-3  
Order Lifecycle Management: Functional Flow 8-4  
Business Flow Implementation 8-5  
Siebel CRM Service 8-6  
Industry Oracle AIA Components 8-7  
Services Provided 8-8  
ProcessSalesOrderFulfillmentSiebelCommsJMConsumer 8-9  
ProcessSalesOrderFulfillmentSiebelCommsReqABCImpl 8-10  
ProcessSalesOrderFulfillmentOSMCFSCCommsJMSProducer 8-12  
“Process Sales Order Fulfillment” Business Flow 8-13  
Summary 8-15  
Quiz 8-16  
Practice 8: Create Customer and New Order 8-20

## **9 “Synchronize Fulfillment Order Billing Account” Business Flow**

Objectives 9-2  
Overview 9-3  
Interfacing Orders to Create Customer Data in the BRM Integration Flow 9-4  
Interfacing Customer Data to Billing 9-5  
Business Flow Implementation: Overview 9-6  
Customer Management Process Integration Services 9-7  
BRM Services 9-8  
Industry Oracle AIA Components 9-9  
Services Provided 9-10  
ProcessFulfillmentOrderBillingAccountListOSMCFSCCommsJMConsumer 9-11  
CommsProcessFulfillmentOrderBillingAccountListEBF 9-12  
Customer Account Creation in BRM 9-13  
Paying Hierarchy 9-14  
CommsProcessBillingAccountListEBF 9-15  
ProcessFulfillmentOrderBillingAccountListOSMCFSCCommsJMSProducer 9-16

Interfacing Orders to Create Customer Data in the BRM Integration Flow 9-17  
Summary 9-19  
Quiz 9-20  
Practice 9: Change Order 9-24

## **10 “Bill Fulfillment Order” Business Flow**

Objectives 10-2  
Overview 10-3  
Interfacing Orders to BRM: Creating and Updating Service Instances 10-4  
Interfacing Orders to BRM: Communicating Pricing Information 10-5  
Interfacing Orders to BRM: Communicating One-Time and Penalty Charges 10-6  
Interfacing Orders to BRM: Communicating Price or Discount Overrides 10-8  
Interfacing Orders to BRM: Communicating Service Identifiers 10-9  
Interfacing Orders to BRM: Communicating Price Lists 10-10  
Interfacing Orders to BRM: Communicating Siebel CRM Promotion  
Information 10-11  
Interfacing Orders to BRM: Rolling Back Transactions 10-12  
Business Flow Implementation: Overview 10-13  
BRM Services 10-14  
Industry Oracle AIA Components 10-15  
Services Provided 10-16  
ProcessFulfillmentOrderBillingOSMCFSCCommsJMConsumer 10-17  
ProcessFulfillmentOrderBillingBRMCommsProvABCImpl 10-18  
ProcessFulfillmentOrderBillingBRMCommsAddSubProcess 10-19  
ProcessFulfillmentOrderBillingBRMCommsMoveAddSubProcess 10-20  
ProcessFulfillmentOrderBillingBRMCommsSuspendResumeSubProcess 10-21  
ProcessFulfillmentOrderBillingBRMCommsUpdateSubProcess 10-22  
ProcessFulfillmentOrderBillingBRMCommsDeleteSubProcess 10-23  
ProcessFulfillmentOrderBillingResponseOSMCFSCCommsJMSProducer 10-24  
Interfacing Orders to Create Transaction Data in BRM 10-25  
Summary 10-27  
Quiz 10-28  
Practice 10: Revision Order 10-32

## **11 “Provision Order” and “Update Fulfillment Order” Business Flows**

Objectives 11-2  
Order Provisioning 11-3  
Creating Provisioning Orders 11-4  
Updating Fulfillment Orders 11-5  
Business Flow Implementation: Overview 11-6  
Industry Oracle AIA Components 11-7

Services Provided 11-8  
ProcessProvisioningOrderOSMCFSCommsJMSConsumer 11-9  
ProcessProvisioningOrderOSMPROVCommsJMSProducer 11-10  
ProcessFulfillmentOrderUpdateOSMPROVCommsJMSConsumer 11-11  
ProcessFulfillmentOrderUpdateOSMCFSCommsJMSProducer 11-12  
OSM COM-to-OSM SOM Provisioning Sequence 11-13  
Summary 11-15  
Quiz 11-16  
Practice 11: Follow-On Order 11-20

## **12 “Update Sales Order” Business Flow**

Objectives 12-2  
“Update Sales Order” Process Integration: Overview 12-3  
Updating Sales Order Data 12-4  
Creating and Updating Installed Assets in Siebel CRM 12-5  
Updating Sales Order Status 12-6  
Real-Time Order Status Updates 12-7  
Order Status Transition Flow 12-8  
Business Flow Implementation: Overview 12-9  
Business Flow Resources Used: Siebel CRM Services 12-10  
Industry Oracle AIA Components 12-11  
Services Provided 12-12  
UpdateSalesOrderOSMCFSCommsJMSConsumer 12-13  
UpdateSalesOrderSiebelCommsProvABCImpl 12-14  
“Update Sales Order” Business Flow: Sequence 12-16  
Summary 12-17  
Quiz 12-18  
Practice 12: Promotion Downgrade 12-22

## **13 Order Fallout Management**

Objectives 13-2  
Order Fallout Management: Overview 13-4  
Order Processing Error Types 13-5  
Order Fallout Detection Subprocess 13-6  
Enriching the Order Fallout Fault Message 13-7  
Enriched Fault Message Contents 13-8  
Order Fallout Detection Subprocess Flow 13-9  
Initiating the Appropriate “Create Trouble Ticket” Business Flow 13-10  
Order Fallout Notification Subprocess Flow 13-11  
Order Correction 13-12  
Order Correction Based on Fault Type 13-13

Order Fallout Management Process Integration: Business Flows 13-14  
 Create and Manage Trouble Ticket from OSM: Overview 13-15  
 Functional Flow 13-16  
 Assumptions and Constraints 13-17  
 Create and Manage Trouble Ticket from OSM Implementation 13-18  
 CreateFaultNotificationLFCommsJMSConsumer 13-19  
 Integration Flows 13-20  
 Order Failure Notification to OSM Integration Flow 13-21  
 AIAOrderFalloutJMSBridgeService 13-22  
 CreateOrderFalloutNotificationOSMCFSCommsJMSConsumer 13-23  
 CreateOrderFalloutNotificationOSMCFSCommsProvImpl 13-24  
 CreateOrderFalloutNotificationOSMCFSCommsJMSProducer 13-25  
 Order Failure Notification to OSM: Sequence 13-26  
 Create Trouble Ticket in Siebel CRM from OSM Integration Flow 13-27  
 CreateTroubleTicketOSMCFSCommsJMSConsumer 13-28  
 CreateTroubleTicketSiebelCommsProvABCImpl 13-29  
 CreateTroubleTicketRespOSMCFSCommsJMS Producer 13-30  
 Create Trouble Ticket in Siebel CRM from OSM: Sequence 13-31  
 Update Trouble Ticket in Siebel CRM from OSM: Industry Oracle AIA  
 Components 13-32  
 Update Trouble Ticket in Siebel CRM from OSM: Siebel CRM Services 13-33  
 Update Trouble Ticket in Siebel CRM from OSM: Integration Flow 13-34  
 UpdateTroubleTicketOSMCFSCommsJMS Consumer 13-35  
 UpdateTroubleTicketSiebelCommsProvABCImpl 13-36  
 Update Trouble Ticket in Siebel CRM from OSM: Sequence 13-37  
 Summary 13-38  
 Quiz 13-40  
 Practice 13: Order Fallout Management 13-44

## **14 Order Lifecycle Management (OLM) and Order Fallout Management (OFM)**

### **Technologies**

Objectives 14-2  
 Exception Handling: Overview 14-3  
 Exception Handling: Implementation 14-4  
 Roles 14-5  
 Error Messages for OLM 14-6  
 Handling Error Notifications Through OFM 14-7  
 Using Error Types to Control Responses to Order Fallout 14-8  
 Extending Error Codes 14-9  
 Handling Business Errors 14-10  
 Transaction Management 14-11

Extensions to Participating Applications 14-13  
Queues 14-15  
Queues List 14-16  
Oracle Mediator Resequencer 14-17  
Session Pool Manager (SPM) 14-18  
Summary 14-19  
Quiz 14-20

## **15 Course Summary**

Course Summary 15-2  
“Order to Cash” Pre-Built Integration 15-3  
Order Lifecycle Management 15-4  
Order Fallout Management 15-5  
Course Assessment 15-6
