

Prepare Your Organization for Microsoft 365 Copilot

Course Overview

This learning path examines the Microsoft 365 Copilot design along with its security and compliance features, and provides practical guidance on how to successfully implement Microsoft 365 Copilot in an organization.

Module 1: Implement Microsoft 365 Copilot

This module examines the key tasks administrators must complete when implementing Microsoft 365 Copilot, including prerequisites, data preparation, license assignment, security considerations, and adoption planning.

- Introduction
- Get ready for Microsoft 365 Copilot
- Implement SharePoint Advanced Management tools to prepare for Microsoft 365 Copilot
- Prepare your data for searches in Microsoft 365 Copilot
- Protect your Microsoft 365 Copilot data with Microsoft 365 security tools
- Assign your Microsoft 365 Copilot licenses
- Extend Microsoft 365 Copilot
- Drive Microsoft 365 Copilot adoption throughout your organization

Module 2: Examine Data Security and Compliance in Microsoft 365 Copilot

This module explores how Microsoft 365 Copilot aligns with privacy, security, and compliance requirements. It explains data residency, compliance boundaries, and how sensitive business data is protected.

- Introduction
- Examine how Microsoft 365 Copilot uses your proprietary business data
- Examine how Microsoft 365 Copilot protects sensitive business data
- Examine how Microsoft 365 Copilot uses Microsoft 365 isolation and access controls
- Examine how Microsoft 365 Copilot meets regulatory compliance mandates
