

Contents

1 Introduction to Planning

- Objectives 1-2
- Oracle Hyperion Planning 1-3
- Planning Components 1-4
- Additional Planning Modules 1-5
- Additional Planning-Based Products 1-6
- Product Integration 1-7
- Planning Architecture 1-8
- Client Tier 1-9
- Middle Tier 1-10
- Data Tier 1-11
- External Services 1-12
- Oracle Exalytics: Overview 1-13
- Planning on Oracle Exalytics: Benefits 1-14
- Planning on Oracle Exalytics: Optimized Engine 1-15
- Planning Business Process 1-16
- Step 1: Entering Data 1-17
- Step 2: Adjusting Data 1-18
- Step 3: Calculating Data 1-19
- Step 4: Annotating Data 1-20
- Step 5: Reviewing and Approving Data 1-21
- Step 6: Running and Publishing Financial Reports 1-22
- Summary 1-23
- Quiz 1-24

2 Introduction to Financial Management

- Objectives 2-2
- About Financial Management 2-3
- Additional Financial Management Components 2-4
- Management of the Extended Close Process 2-5
- Product Integration 2-6
- Financial Management Architecture 2-7
- Client Tier 2-8
- Middle Tier 2-9
- Data Tier 2-10
- External Services 2-11

- Financial Management Business Process 2-12
- Step 1: Entering Data 2-13
- Step 2: Calculating Data 2-14
- Step 3: Adjusting Data 2-15
- Step 4: Translating and Consolidating Data 2-16
- Step 5: Reviewing and Approving Data 2-17
- Step 6: Running and Publishing Financial Reports 2-18
- Summary 2-19
- Quiz 2-20

3 Preparing the Installation Environment

- Objectives 3-2
- Installation: Overview 3-3
- Installation Checklist 3-4
- Preparing Third-Party Software 3-5
- Preparing the Work Area 3-6
- Planning the Deployment Architecture 3-7
- Sample Deployment Scenarios 3-10
- Deployment for 100 to 500 Users 3-12
- Deployment for 1000 Users 3-13
- Virtual Deployments 3-14
- Preparing Server Disk Space and RAM 3-16
- Preparing Client Disk Space and RAM 3-21
- Preparing the Security Infrastructure 3-23
- Configuring SSL 3-25
- Full SSL Deployment 3-26
- SSL Terminating at the Web Server 3-27
- SSL Deployment with an Off-Loader 3-28
- Two-Way SSL Deployment 3-29
- Preparing Web Application Servers 3-30
- Preparing Web Servers 3-33
- Preparing Web Browsers 3-34
- Default Ports 3-35
- ABC Corporation: Overview 3-36
- Summary 3-38
- Quiz 3-39
- Practice 3: Overview 3-45

4 Preparing the Software Requirements

- Objectives 4-2
- Selecting a Supported Platform 4-3

- Selecting a Supported Database 4-4
- Classroom Database Definition 4-6
- Accessing Oracle Software and Documentation 4-7
- Preparing the Required Software 4-8
- Release Compatibility 4-9
- EPM System Software Dependencies 4-11
- Preparing Third-Party Software 4-12
- Summary 4-13
- Quiz 4-14
- Practice 4: Overview 4-20

5 Installing Product Components

- Objectives 5-2
- EPM System Installer: Overview 5-3
- Installing EPM System Products 5-5
- Reviewing System Prerequisites 5-6
- Specifying the Middleware Home Directory 5-7
- Selecting an Installation Type 5-9
- Selecting the Products to Install 5-11
- Confirming Your Selections 5-13
- Reviewing the Summary Report 5-14
- Performing Silent Installations 5-15
- Installing Foundation Services 5-18
- Installing Essbase 5-20
- Installing Planning and Offline Planning 5-21
- Installing Planning Modules 5-23
- Installing Financial Management 5-24
- Installing Financial Close Management, Tax Management, Disclosure Management, and Strategic Finance 5-25
- Installing FDMEE 5-26
- Installing Reporting and Analysis Framework 5-27
- Installing Reporting and Analysis 5-29
- Reporting and Analysis Architecture 5-30
- Installing Smart View 5-32
- Summary 5-33
- Quiz 5-34
- Practice 5: Overview 5-41

6 Understanding Configurations

- Objectives 6-2
- Launching EPM System Configurator 6-3

Configuration Tasks 6-5
Configuration Sequence 6-6
Configuring Products in a Clustered Environment 6-8
Performing Silent Configurations 6-9
Summary 6-11
Quiz 6-12

7 Configuring Shared Services

Objectives 7-2
Running EPM System Configurator for Shared Services 7-3
Configuring the EPM Oracle Instance 7-5
Configuring the Shared Services and Registry Database Connection 7-6
Configuration Selection 7-8
Configuring EPM System Common Settings 7-9
Deploying to the Application Server 7-10
Setting the Shared Services Admin User Password 7-12
Launching the Shared Services Console 7-13
Configuring Single Sign-On 7-14
Configuring User Directories 7-16
Configuring MSAD or LDAP User Directories 7-17
Configuring Users 7-18
Configuring Groups 7-19
Provisioning Users and Groups 7-20
Generating Provisioning Reports 7-21
Creating Application Groups 7-22
Summary 7-23
Quiz 7-24
Practice 7: Overview 7-31

8 Configuring Performance Management Architect and Calculation Manager

Objectives 8-2
Configuring Performance Management Architect 8-3
Configuring the EPM Oracle Instance 8-4
Configuration Selection 8-5
Configuring the Performance Management Architect Database 8-6
Deploying Performance Management Architect to the Application Server 8-8
Creating an Interface Data Source 8-10
Configuring Calculation Manager 8-12
Configuring the EPM Oracle Instance 8-13
Configuration Selection 8-14
Configuring the Calculation Manager Database 8-15

Deploying Calculation Manager to the Application Server 8-17

Summary 8-19

Quiz 8-20

Practice 8: Overview 8-23

9 Configuring Essbase

Objectives 9-2

Configuring Essbase Components 9-3

Configuring the EPM Oracle Instance 9-4

Configuration Selection 9-5

Configuring the Essbase Studio and Administration Services Database 9-6

Deploying Administration Services and Provider Services to the Application Server
9-8

Specifying the Essbase Studio Data File Location 9-10

Configuring the Essbase Server 9-11

Essbase Authentication 9-13

Adding Essbase Servers 9-14

Summary 9-15

Quiz 9-16

Practice 9: Overview 9-20

10 Configuring Planning

Objectives 10-2

About Planning Configuration 10-3

Configuring Planning Modules 10-4

Configuring the EPM Oracle Instance 10-5

Configuration Selection 10-6

Configuring the Planning System Database 10-7

Deploying Planning to the Application Server 10-8

Configuring the RMI Server 10-10

Installing and Configuring Offline Planning 10-11

Installing Reporting and Analysis 10-13

Installing Smart View 10-14

Summary 10-15

Quiz 10-16

Practice 10: Overview 10-19

11 Configuring Financial Management

Objectives 11-2

Configuring Financial Management 11-3

Configuring the EPM Oracle Instance 11-4

Configuration Selection	11-5
Configuring the Financial Management Database	11-6
Deploying Planning to the Application Server	11-7
Configuring the Financial Management Application Server	11-9
Configuring Financial Management Servers and Clusters	11-10
Registering Financial Management Servers and Clusters	11-11
Summary	11-12
Quiz	11-13

12 Configuring Financial Reporting and Workspace

Objectives	12-2
Configuring Financial Reporting and Framework Services	12-3
Configuring the EPM Oracle Instance	12-5
Configuration Selection	12-6
Configuring the Reporting and Analysis Database	12-7
Configuring Reporting and Analysis Framework Services	12-8
Deploying Reporting and Analysis to the Application Server	12-9
Configuring Reporting and Analysis Framework Agent Ports	12-11
Configuring RMI Ports	12-12
Configuring the Workspace Web Server	12-13
Configuration Selection	12-14
Configuring Web Server Type and Port	12-15
Installing Financial Reporting Studio Through Workspace	12-16
Installing Financial Reporting Studio by Using FinancialReportingStudio.exe	12-18
Integrating Products with Workspace	12-20
Summary	12-21
Quiz	12-22

13 Troubleshooting the EPM System Installation

Objectives	13-2
Troubleshooting Basics	13-3
Reviewing Documentation	13-4
Checking Release Compatibility	13-5
Identifying Port Conflicts	13-6
Starting and Stopping EPM Services	13-7
Validating the Installation and Configuration	13-8
Viewing and Analyzing Log Files	13-9
Troubleshooting Product-Specific Issues	13-10
Accessing Technical Support Resources	13-11
Summary	13-12
Quiz	13-13

14 Accessing Planning

- Objectives 14-2
- Verifying the Installation 14-3
- Starting Services 14-4
- Logging On to Workspace 14-5
- Creating and Deploying Applications 14-7
- Managing Data Sources 14-8
- Creating Applications in Performance Management Architect 14-10
- Creating Applications in Classic Application Administration 14-11
- Creating Applications in Simplified Interface 14-12
- Creating Essbase Databases 14-13
- Refreshing Essbase Databases in Simplified Interface 14-14
- Provisioning Users and Groups 14-15
- Installing and Configuring Smart View 14-16
- Accessing Planning Applications 14-17
- Accessing Planning Applications in Workspace 14-18
- Accessing Planning Applications in Smart View 14-19
- Taking Forms Offline 14-21
- Accessing Planning Outlines in Administration Services 14-22
- Testing Financial Reporting Connectivity 14-23
- Managing Financial Reporting Database Connections 14-24
- Summary 14-25
- Quiz 14-26

15 Switching Application Modes

- Objectives 15-2
- Application Upgrade Wizard 15-3
- Transforming Classic Applications to Performance Management Architect Applications 15-4
- Step 1: Reviewing the Welcome Page 15-5
- Step 2: Reviewing the Application Summary 15-6
- Step 3: Selecting Applications 15-7
- Step 4: Reviewing the Transformation Summary 15-8
- Step 5: Viewing Job Console 15-9
- Step 6: Viewing Application Library 15-10
- Step 7: Accessing the Application 15-11
- Switching Performance Management Architect Applications to Classic Applications 15-12
- Summary 15-13
- Quiz 15-14

16 Verifying the Financial Management Installation

- Objectives 16-2
- Testing Process 16-3
- Starting Required Services 16-4
- Logging On to Workspace 16-5
- Creating Import Profiles 16-7
- Importing Dimensions 16-8
- Creating Applications 16-9
- Selecting Dimensions 16-10
- Configuring the Application Settings 16-12
- Deploying Applications to Application Servers 16-14
- Validating Applications 16-15
- Deploying Applications 16-16
- Viewing Job Status 16-17
- Loading Data 16-18
- Summary 16-19
- Quiz 16-20

17 Reporting Tools

- Objectives 17-2
- Installing Reporting Studio 17-3
- Creating a Financial Reporting Report 17-4
- Testing Related Content 17-5
- Summary 17-6
- Quiz 17-7

18 Moving Classic Applications to Performance Management Architect

- Objectives 18-2
- Application Transformation: Overview 18-3
- Accessing Application Upgrade Wizard in Workspace 18-4
- Step 1: Reviewing the Welcome Page 18-5
- Step 2: Reviewing the Application Summary 18-6
- Step 3: Selecting Applications 18-7
- Step 4: Reviewing the Transformation Summary 18-8
- Step 5: Viewing Job Console 18-9
- Step 6: Viewing Application Library 18-10
- Step 7: Accessing the Application 18-11
- Summary 18-12
- Quiz 18-13

19 Performing System Maintenance

- Objectives 19-2
- Backup and Restore: Overview 19-3
- Backing Up Databases and File Systems 19-5
- Backing Up Windows Registry Settings 19-8
- Backing Up and Restoring EPM System Products 19-9
- Managing EPM System Log Files 19-13
- Summary 19-16
- Quiz 19-17

20 Upgrading EPM System Products

- Objectives 20-2
- Upgrade: Overview 20-3
- Supported Upgrade Paths 20-4
- Upgrade Checklist 20-5
- Performing Upgrade Installation Prerequisites 20-6
- Preparing Data for Upgrade 20-7
- Uninstalling Earlier Releases of EPM System Products 20-8
- Installing EPM System Products for an Upgrade 20-9
- Configuring EPM System Products for an Upgrade 20-10
- Performing Additional Product-Specific Upgrade Tasks 20-11
- Upgrading from Multiple Releases 20-13
- Summary 20-14
- Quiz 20-15

21 Performing Migrations with Lifecycle Management

- Objectives 21-2
- Lifecycle Management: Overview 21-3
- Migrating on Connected and Disconnected Environments 21-5
- Lifecycle Management Requirements 21-6
- Lifecycle Management Security 21-7
- Artifacts: Overview 21-8
- Planning Artifacts 21-9
- Financial Management Artifacts 21-11
- Performance Management Architect Artifacts 21-12
- Essbase Artifacts 21-13
- Calculation Manager Artifacts 21-14
- Foundation Services Artifacts 21-15
- Reporting and Analysis Artifacts 21-16
- Viewing and Searching for Artifacts 21-17
- Application and Artifact Migration Process 21-18

Oracle Hyperion EPM 11.1.2 Installation & Configuration

Migration Scenario	21-19
Migration Guidelines	21-20
Migrating Application Artifacts to a File System	21-22
Migrating Applications from the File System to a Destination Application	21-23
Exporting and Importing Individual Artifacts for Editing	21-24
Automating Migration Tasks	21-25
Running the Lifecycle Management Utility	21-26
Viewing Migration Status Reports	21-28
Viewing Audit Reports	21-29
Summary	21-31
Quiz	21-32
