

AI-103T00: Develop AI apps and agents on Azure Exam Prep

Duration: 4 hours

Course Overview

This focused exam prep session is designed for developers and AI engineers preparing for the AI-103T00: Develop AI apps and agents on Azure — an associate-level exam that validates your knowledge of creating applications using Microsoft Foundry. In 4 intensive hours, participants will rapidly revisit the core exam domains, sharpen their understanding of high-weightage topics, and understand the pattern and types of questions that mirror the actual exam. The certification aligns with today's generative and agentic architectures — covering planning and managing AI resources in Microsoft Foundry, building generative apps and multistep reasoning workflows, and developing production-ready agents with multi-agent orchestration capabilities.

Session Agenda

- Welcome and Exam Overview
- Revision based on skills overview
- Exam booking process and Exam tips
- Qna and wrap up
