Contents

1 Overview

- Objectives 1-2
- The 5-Minute Overview 1-3
- Prerequisites 1-5
- Product Stack 1-6
- What's Included in W1 1-7
- Format of This Class 1-9
- Practice 1-1: WAM Login 1-10
- Summary 1-11

2 User Interface Standards

- Objectives 2-2
- Anatomy of All Pages 2-3
- Portals Versus Fixed Pages 2-6
- Portals Have Zones 2-7
- Portal Configuration 2-8
- Portals May Appear on Portal Preferences 2-9
- If Users Can Override a Portal's Default Configuration 2-10
- Dictating Portal Preferences 2-11
- The Dashboard Is a Portal Too 2-12
- Zone Patterns 2-14
- Layout of Explorer Zones 2-15
- Broadcasting 2-16
- Work Lists 2-17
- Working the List 2-18
- Starting Business Processes 2-19
- Practice 2-1: Explore Preferences 2-20
- Map Zones 2-22
- Section and Element Help 2-23
- Explorer Zones Are Configured, Not Programmed 2-25
- Configuring Map Zones 2-26
- Special Zones: Feature Configuration 2-28
- You Have Seen Several BPA Scripts 2-30
- BPA Scripts Are Everywhere 2-31
- BPA Scripts Reflect an Organization 2-32

Scripts Are Configured 2-33
Menu Bar 2-35
Menu Items 2-36
Context Menus 2-37
Practice 2-2: Menu Navigation 2-38
Summary 2-39

3 Metadata and Framework: Overview

Agenda 3-2
Objectives 3-3
Four Tiers and Supported Platforms 3-5
The Location of the Business Rules 3-6
A Quick Word About the UI Tier 3-7
Entity Relationship Diagramming (ERD) 3-9
Information Is Stored in Tables; Each Box in an ERD Is a Table 3-10
Color-Coding Highlights the Type of Data Stored in the Table 3-11
We Use ERDs to Highlight Important Business Relationships 3-12
Relationships Between Entities Are Highlighted with Arrows Between Boxes 3-13
Dashed Lines Represent Columns on Entities with Predefined
 “Lookup” Values 3-14
Table and Field Metadata 3-16
The Application Viewer Is Your Primary Documentation of Tables and Fields 3-17
The Application Viewer Is Generated from Metadata 3-18
Practice 3-1: Explore Application Viewer 3-19
No Recurring Groups 3-21
Primary Keys 3-22
Prime and Foreign Keys in the Application Viewer 3-23
Language Tables 3-24
XML Extensions 3-25
MO Definition 3-27
Why MOs? 3-28
MO, Table, Field Metadata 3-29
MOs Are Also in the App Viewer 3-30
MOs Encapsulate Core Business Rules 3-32
Maintenance Objects Versus Business Objects 3-34
A Maintenance Object Has Fields, A Business Object Has Elements 3-35
Every BO Element Must Physically Reside Somewhere in Its MO’s Tables 3-36
BOs Encapsulate Core Business Rules 3-37
BOs and SOA 3-38
All Business Objects Can Be Extended 3-40
Product Parent BO Versus Customer Child BO 3-41

Extended BO References Parent BO 3-42
Extension Simplified by UI Rendered Schemas 3-44
UI Hint Namespace 3-45
Schema Designer 3-46
UI Hints Are Powerful 3-47
Extension Made Easy by XML Area 3-49
Format of Data when Mapped to XML 3-50
Lookup Requires Field 3-51
Lookup Creation 3-52
Many MOs Support Characteristics 3-54
There Are Four Types of Char Types 3-55
Predefined Char Types 3-56
Ad Hoc Characteristic Types 3-57
Foreign Key Reference Characteristic Types 3-58
File Location Characteristic Types 3-59
A Char Type Can Be Used on Multiple Entities 3-60
Practice 3-2: Explore Business Objects 3-61
Owning Metadata 3-63
Owner Flag ERD 3-64
Owner Flag Is Ubiquitous 3-65
The System Stamps Owner Flag on New Metadata Rows 3-66
Don't Even Think About It 3-67
Database and Operating System Security 3-69
Application Services Are Secured 3-70
Application Services Have Valid Actions 3-71
Field-Level Security 3-72
Field-Level Security: Overview 3-73
Security Rights Are Cached 3-74
Audit Trails 3-76
Localization Support 3-77
Isolating Implementation-Specific Business Rules 3-78
Summary 3-79

4 Common Extension Patterns

Objectives 4-2
Business Object Extension Is a Design Intension 4-3
Parent Business Objects Remain Untouched 4-4
Product Parent BO Versus Customer Child BO 4-5
BO Extension Is a Design Intention 4-6
BO Data Element Mapping Choices 4-7
Generic Child Table ERD 4-9

Common Child Tables 4-10
Generic Identifier Child Table ERD 4-13
When to Map to an Identifier 4-14
How to Map to an Identifier 4-15
Practice 4-1: Mapping to an Identifier Type 4-16
Generic Characteristic Child Table ERD 4-18
When to Map to a Characteristic 4-19
How to Map to a Characteristic 4-20
Practice 4-2: Mapping to a Characteristic Type 4-21
Generic XML ERD 4-23
When to Map to XML 4-24
How to Map to XML 4-25
What to Map to? 4-27
When Not to Map to XML 4-28
Extension Helper Documentation 4-30
Practice 4-3: Mapping to XML 4-31
Review Question 4-32
Summary 4-33

5 Location

Objectives 5-2
Asset Definition 5-3
The Relationship of the Asset Objects 5-4
Locations Describe the Asset Life Cycle: Overview 5-5
Asset Location Is Where Assets Are Installed 5-6
Location Definition 5-7
Single Node Table, Three Different Objects 5-8
Asset, Storeroom, Out of Service, and Organization 5-9
Why a Single Node Table 5-10
The Asset's Location Relation 5-11
Loc/Org Type, Node, and BO 5-13
Asset Location, Out of Service Location, and Organization 5-14
Detailed Location/Organization Type ERD 5-15
Basic Node Configuration 5-16
More Node Configuration 5-17
Practice 5-1: Explore Location and Organization Type 5-18
Contact Type, Contact, and BO 5-20
Location Contacts ERD 5-21
Practice 5-2: Explore Contacts 5-22
Asset Location, Storeroom, Out of Service Location, and Organization 5-24
Detailed Location ERD 5-25

Parent Location 5-26
Peer Location 5-27
More Location Information 5-28
Location and Organization BOs 5-29
Practice 5-3: Explore Locations 5-30
Summary 5-31

6 Specifications

Objectives 6-2
Asset Definition 6-3
The Relationship of the Asset Objects 6-4
An Asset Can Have Two Different Specifications 6-5
Practice 6-1: Explore Manufacturer Specifications 6-7
Practice 6-2: Specification Business Object 6-8
Summary 6-9

7 Asset

Objectives 7-2
Asset Definition 7-3
The Relationship of the Asset Objects 7-4
Asset Type, Asset, and BO 7-6
Asset Type ERD 7-7
Configurable Asset Attributes by Asset Type 7-9
More Asset Type Configuration 7-10
More Component Type Configuration 7-11
Practice 7-1: Explore Asset Type 7-12
Asset ERD 7-14
Asset Attributes 7-16
An Asset Must Have a Location 7-17
Asset Disposition 7-18
Why Extendable Lookup 7-19
Asset Lifecycle and Asset Disposition 7-20
Another Class of Asset 7-21
Component Disposition 7-22
Look at Asset Disposition Again 7-23
Asset Disposition 7-24
Notes on Asset 7-25
Asset Condition 7-26
Asset MO Rules 7-28
Overview 7-30
Status Transition Map and Scripts 7-31

Tracked Asset BO Lifecycle 7-32
In/Out of Service Asset BO Lifecycle 7-33
Tracked Component BO Lifecycle 7-34
In/Out of Service Component Asset BO Lifecycle 7-35
Practice 7-2: Explore Assets 7-36
New State May Require New Disposition 7-38
Existing Asset Dispositions 7-39
Summary 7-40

8 Service History

Objectives 8-2
Asset Definition 8-3
The Relationship of the Asset Objects 8-4
The Purpose of Service History 8-6
Service History ERD 8-7
Service History Types Defined for Asset Types 8-8
Follow Up Work 8-9
Follow Up Work Automation Through SH Type Configuration 8-10
Corrective Compliance 8-12
Compliance Type 8-13
Compliance Class 8-14
Practice 8-1: Explore Service History 8-15
Summary 8-16

9 Assessment

Objectives 9-2
Asset Definition 9-3
The Relationship of the Asset Objects 9-4
The Beauty of Assessment 9-6
Assessment Belongs to Asset 9-7
Question and Answer Metadata 9-8
The Four Flavors of Assessment 9-9
The Five Flavors of Questions 9-10
A Percent of New Question: Example 9-11
A General Weighted Question: Example 9-12
A Deficiency Scoring Question: Example 9-13
Practice 9-1: Explore Assessment Functionality 9-14
Assessment Class and Assessment Group 9-16
How an Asset's Condition Is Scored 9-17
Where an Asset's Condition Is Scored: Assessment 9-18

Practice 9-2: Assessment Classes 9-19
Summary 9-20

10 Measurement

Objectives 10-2
Asset Definition 10-3
The Relationship of the Asset Objects 10-4
An Asset's Measurements 10-6
Asset Has Measurement Types 10-7
Measurement Classes 10-8
Measurement BO 10-9
Measurement Alerts 10-10
Measurement Type BO 10-11
Measurement Lifecycle 10-12
Measurement BO Lifecycle 10-13
Practice 10-1: Explore Measurements 10-14
Summary 10-15

11 Approval Processing

Objectives 11-2
Overview 11-3
Purpose of an Approval Request 11-4
Every Approval Request References an Approval Profile 11-5
Purpose of an Approval Profile 11-7
An Approval Profile Is for One Type of Object Only 11-8
Approval Types 11-9
To Do Type and To Do Role 11-10
Notification Types 11-11
Three 'Classes' of Approval Profiles 11-12
A New Plug-In Spot 11-13
Practice 11-1: Explore Approval Profiles 11-14
Purpose of an Approval Request (Reminder) 11-16
Life Cycle of Approval Requests 11-17
What an Approval Request Looks Like 11-18
Work With Approval Requests 11-19
Work with Approval Requests 11-20
Practice 11-2: Explore Approval Requests 11-22
Configuring Approval Process: Introduction 11-24
Add an MO Option 11-25
Add Approval Request History Zone 11-26
BO Life Cycle: Example to Add a Status 11-27

BO Life Cycle: Example to Add Algorithms 11-28

Review Questions 11-29

Summary 11-30

12 Work Order and Work Order Activity

Objectives 12-2

Overview 12-3

Purpose of a Work Order 12-4

Purpose of Activity 12-5

Purpose of Activity Resource Requirement 12-6

Different Ways to Add Activity Resource Requirements 12-7

Work Order Number 12-8

Activity Asset List 12-9

Practice 12-1: Explore Work Order Requirements 12-10

Changes Do or Do Not Require Re-Submit for Approval 12-11

Approved Versus Activated 12-12

How to Activate a Work Order and Activity 12-13

Original Estimate Versus Revised Estimate 12-14

Activity Material Requirements' Impact on Inventory 12-15

Reserve Material in Storeroom 12-16

Held For Parts 12-17

Practice 12-2: Approved Work Orders 12-18

Purpose of a Template Work Order 12-19

Template Work Order ERD 12-20

General Versus Location-Specific 12-21

Create Template Work Order 12-22

Practice 12-3: Template Work Orders 12-23

Completion Events 12-24

Completion Event and Activity 12-25

Completion Event Execution Information 12-26

More About the "Create Any Service History Completion Event" 12-27

Completion Event Type and Completion Event 12-28

Completion Event and Integration 12-29

Tracking Cost 12-30

Time Sheet Restriction 12-31

Practice 12-4: Completion Events 12-32

Summary 12-33

13 Preventive Maintenance

Objectives 13-2

Maintenance Schedule and Maintenance Trigger 13-3

A Simple Maintenance Example (From Your Glove Box)	13-4
Trigger Philosophy – Squared	13-6
Maintenance Trigger Types	13-7
Calendar Anniversary Timeline	13-8
Calendar Interval Timeline	13-9
Runtime Anniversary Timeline	13-10
Runtime Interval Timeline	13-11
Common Trigger Processing	13-13
Common Runtime Processing	13-14
Preventive Maintenance (PM) Work Calendar	13-15
Anniversary Processing	13-16
Maintenance Trigger	13-17
Preventive Maintenance Compliance	13-18
Compliance Type	13-19
Compliance Class	13-20
Asset Location Specific Template Work Order	13-21
Asset Location Specific Maintenance Trigger	13-22
Practice 13-1: Maintenance Schedules and Triggers	13-23
Specification Schedule Relationship Types	13-25
Maintenance Specification Algorithm Entity	13-26
Practice 13-2: Maintenance Specifications and Algorithms	13-27
Asset Monitor: In-Service and In-Store States	13-29
Asset Trigger Forecast	13-31
Common Trigger API	13-32
Summary	13-33

14 Scheduling

Objectives	14-2
Shift ERD	14-3
Crew Shift Capacity	14-4
Time Periods	14-5
Schedule Priority	14-6
Capacity Behavior	14-7
Time Periods: Example	14-8
What’s Really Being Scheduled	14-9
Activity Labor Requirement: Time to Schedule	14-10
Scheduler Warnings Are Not Errors	14-11
Schedule Update	14-12
Scheduling from Different Pages	14-13
Practice 14-1: Explore Scheduling	14-14
Summary	14-15

15 Inventory

- Objectives 15-2
- Location Type ERD 15-3
- Stock Item Is One Class of Resource Type (MO) 15-4
- Lot Managed, Tracked Asset, and Regular Inventory 15-5
- Stock Item Detail (SID) 15-6
- Stock Item Detail Classes 15-7
- Inventory-Related Quantities 15-8
- Master Versus Specific Lot SID 15-9
- Master and Lot-Specific SID ERD 15-10
- Lot-Specific SID Is Created By the System 15-11
- SID Lifecycle 15-12
- Stock Transaction (ST) 15-13
- Stock Reorder 15-16
- Reorder Review 15-17
- Purchase Document Creation 15-18
- Inventory Financial Information Configuration 15-19
- Storeroom Financial Information 15-20
- Stock Item Financial Information 15-22
- Stock Item Detail Financial Information 15-23
- Tracked Asset and Inventory Management 15-24
- Tracked Asset Inventory 15-25
- Bills of Material (BOM) 15-26
- BOM ERD 15-27
- Miscellaneous 15-28
- Practice 15-1: Explore Inventory Processes 15-29
- Summary 15-30

16 Purchasing

- Objectives 16-2
- PO Revision 16-3
- What Does Create Revision Do? 16-4
- What to Do on the New Revision? 16-6
- What Happens to the Old PO? 16-8
- Practice 16-1: Explore Purchase Orders 16-9
- Taxes 16-10
- Tax Rate Schedule ERD 16-11
- Tax Example 16-12
- Understand Bill Factor 16-13
- Characteristic Source Algorithm 16-14
- Retrieve Value (Factor BO) Algorithm 16-15

Tax Calculation (PR/PO/Invoice Line BOs) Algorithm 16-16
Extend the System to Include Taxes 16-17
Set Up Characteristic Type 16-18
Set Up Factor 16-19
Set Up a Rate Schedule 16-20
Extend BOs: Data Area Extension 16-21
Extend BOs: New BOs 16-22
Practice 16-2: Explore Taxing Data 16-23
Summary 16-24

17 Financials

Objectives 17-2
Overview 17-3
Financial Transaction ERD 17-4
Accounting Calendar 17-5
Financial Transaction Type 17-6
Activity ID on Financial Transaction 17-7
How/When Are FT(s) Created 17-8
What Happens Upon Cancellation 17-9
“Allow User Charge” Flag on Cost Center 17-10
Distribution Code 17-11
Base GL Account Construction Algorithm Type 17-12
GL Account Construction Algorithm: Example 17-13
A Complete List of Objects (MO) That Create FT 17-14
Interface GLs to Your Financial System 17-15
FT Process 17-16
FT BO Lifecycle 17-17
FT Error 17-18
Fixing FT Error 17-19
Practice 17-1: Lifecycle Business Objects 17-20
Summary 17-21

18 Warranty

Objectives 18-2
Asset Definition 18-3
Classes of Warranty 18-4
Warranty Term and Warranty 18-5
Calendar Warranty ERD 18-6
Runtime Warranty ERD 18-7
Warranty Dependency 18-8
Expiring Warranty Warning 18-9

When to Warn About Expiring Warranties 18-10
Practice 18-1: Explore Warranties 18-11
Summary 18-12

19 Material Disposition

Objectives 19-2
Overview 19-3
How a Material Disposition Is Created 19-4
Stock Item Detail ERD 19-5
Material Disposition ERD 19-6
Material Disposition Actions 19-7
How Are Material Dispositions Closed? 19-8
Practice 19-1: Explore Material Disposition 19-9
Summary 19-10

20 Maintenance Event

Objectives 20-2
Maintenance Event 20-3
Maintenance Event: What, Where, and When 20-4
Maintenance Event Objects 20-5
Maintenance Event: What, Where, and When 20-7
Maintenance Plan Configuration – Think Location 20-8
Maintenance Event: What, Where, and When 20-10
Maintenance Event Configuration – Trigger Selection 20-11
Maintenance Event: How to Generate Work Orders 20-12
Maintenance Event: Scheduling Information 20-13
Practice 20-1: Maintenance Event Configuration 20-14
Practice 20-2: Maintenance Event Generation 20-15
Summary 20-16

21 Compatible Units

Objectives 21-2
Construction – Three Pieces to Create New Assets 21-3
Compatible Unit (CU) Subsystem Overview 21-4
Compatible Unit Objects 21-5
CU Set – Where to Configure Hierarchy of Information 21-7
Practice 21-1: Compatible Unit Set 21-8
Compatible Unit: Three Types 21-10
Compatible Unit ERD 21-11
Compatible Units – Referenced CU 21-12
Compatible Units – Price 21-13

Selectable Compatible Units: CU Application 21-14
Functional Compatible Unit – Constructed Asset 21-15
Practice 21-2: Compatible Unit Review 21-16
Contractor Bid – Applied CU Only 21-18
Practice 21-3: Contractor Bid Review 21-19
Summary 21-20

22 Work Design

Objectives 22-2
Construction: Three Pieces to Create New Assets 22-3
Work Design Overview 22-4
Work Design Objects 22-5
Work Design: Overview 22-7
Work Design: Design Version 22-8
Work Design: Add CU to Multiple Design Elements 22-9
Work Design: Estimate 22-11
Work Design: Adjusting the Resource Total 22-12
Work Design: Adding new Line Items 22-13
Work Design: Estimate Grand Total 22-14
Work Design: Create a Design Element 22-16
Work Design: Design Element Information 22-17
Design Element – Add CU, Compatible Unit Portal Tab 22-19
Modifying Design Element Resources 22-20
Design Element Resources – Crew Type 22-21
Work Design – Generate Work 22-23
Design Element vs. Work Activity 22-24
Practice 22-1: Explore a Work Design 22-25
Practice 22-2: Create a New Design Version 22-26
Summary 22-27

23 Construction Work Order

Objectives 23-2
Construction: Three Pieces 23-3
Construction Work Order: Objects 23-4
How to Identify Construction Work Order/Activity 23-5
Construction Activity vs Regular Work Activity 23-6
Work Design is Used to Create a Construction Work Order 23-7
Construction Location 23-8
Construction Location ERD 23-9
Construction Work Order/Activity Cost Summaries 23-11
CU and Activity Resource Requirement 23-12

CU Contractor Bid	23-13
Direct Overhead Cost	23-14
When/How Is Direct Overhead Cost Applied	23-15
Direct Overhead Cost is Applied As Other Direct Charge	23-16
Indirect Overhead Cost	23-17
Indirect Overhead Admin Object	23-18
When/How Is Indirect Overhead Cost Applied	23-19
Construction Work Activity: Lifecycle Accounting	23-21
Work In Progress (WIP) Cost Center Can Be Defaulted	23-22
Reconciliation Cost Centers	23-23
CU Usage	23-24
Practice 23-1: Review of Direct and Indirect Overheads	23-25
Overview	23-27
Algorithms On Activity Reconciliation BO	23-28
Activity Reconciliation ERP	23-29
Closing the Construction Work Activity	23-30
Activity Reconciliation Creation	23-31
What's The Significance of CU	23-32
Construction Activity Completion	23-33
Understand Asset Actions	23-34
Practice 23-2: Review of Activity Reconciliation	23-35
Summary	23-36

24 Work Request and Service Call

Objectives	24-2
Work Request Versus Service Call	24-3
Work Request MO ERD	24-4
Service Category and Service Code	24-5
Service Code	24-6
How A Service Call Is Processed	24-7
Related Service Calls	24-8
Contact	24-9
Communication Log	24-10
Practice 24-1: Explore Service Call	24-11
Summary	24-12

25 Checklist

Objectives	25-2
Overview	25-3
Checklist ERD	25-4
Checklist Type ERD	25-5

Where Checklist Is Used 25-6
How/Where Are Processing Impact Rule Enforced 25-7
How To Enable Checklist For Other MO's 25-8
Practice 25-1: Explore Checklist 25-9
Summary 25-10

26 Permit

Objectives 26-2
Overview 26-3
Permit Template ERD 26-4
Permit ERD 26-5
Permit Class ERD 26-6
Permit Can Have Checklists 26-7
Activity and Permit 26-8
Checklist Type ERD 26-9
Checklist ERD 26-10
Different BO's and Zones for General Checklist/Type and Permit Item
 Only Checklist 26-11
Permit Service History 26-12
Service History ERD 26-13
Practice 26-1: Explore Permit 26-14
Summary 26-15

27 GIS Integration

Objectives 27-2
Architecture: Overview 27-3
GIS Map Viewer 27-5
GIS Map Viewer Is Web Maps Based 27-6
Launching the GIS Map Viewer 27-7
Creating Work 27-8
Creating a Work Location 27-9
Master Configuration 27-10
Additional Master Configuration 27-11
GIS Map Viewer Configuration Summary 27-12
Practice 27-1: Explore GIS Map Viewer 27-13
Supported Synchronized Entities 27-15
GIS to WAM Synchronization Is Version Based 27-16
Asset Synchronization 27-17
GIS Feature Synchronization Eligibility 27-18
GIS to WAM Field Mapping 27-19
Use Characteristics for Custom GIS Fields 27-20

GIS to WAM Field Value Mapping	27-21
GIS to WAM Asset Detail Sync	27-22
Design Your Mapping Between the Systems	27-23
Practice 27-2: Explore Mapping Entities	27-24
Asset Synchronization Modes	27-25
Master Data Synchronization	27-26
GIS to WAM Initial Synchronization	27-27
GIS to WAM Ongoing Synchronization	27-28
Geo Processing Service	27-29
Additional Custom Rules	27-30
Asset Synchronization Configuration Summary	27-31
Asset Removals and Abandonments	27-32
Referencing Original Asset	27-33
Removal and Abandonment Configuration Notes	27-34
Asset Updates Are Sent Synchronously	27-35
Work Locations Are Created Synchronously	27-36
Practice 27-3: Explore Asset Synchronization Configuration	27-37
Summary	27-38
