

React Angular SyncFusion (5 Days)

Day 1: Introduction to SyncFusion and React Angular

- Introduction to SyncFusion and its components
- Setting up SyncFusion in a React Angular project
- Overview of SyncFusion controls (e.g., Grid, Chart, Calendar)
- Hands-on lab: Creating a simple React Angular application with SyncFusion controls

Day 2: SyncFusion Controls and Data Binding

- Exploring SyncFusion controls (e.g., ListView, DropDownList, Button)
- Data binding and data sources in SyncFusion
- Hands-on lab: Creating a data-driven application with SyncFusion controls

Day 3: Advanced SyncFusion Features

- Advanced features of SyncFusion controls (e.g., filtering, sorting, grouping)
- Using SyncFusion with other React Angular frameworks (e.g., Redux, React Router)
- Hands-on lab: Implementing advanced features in a React Angular application

Day 4: SyncFusion Reporting and Analytics

- Introduction to SyncFusion reporting and analytics tools
- Creating reports and dashboards with SyncFusion
- Hands-on lab: Creating a report and dashboard with SyncFusion

Day 5: SyncFusion Deployment and Best Practices

- Deploying SyncFusion applications
- Best practices for using SyncFusion in React Angular applications
- Hands-on lab: Deploying a SyncFusion application please share hourwise detailed table of content
