

India Digital Personal Data Protection (DPDP) Compliance

**Add value.
Inspire trust.**

Comply with the new data protection act

The challenge

The need of the hour is to have a robust data protection framework in India. The introduction of the DPDP act in the country reflects the growing need for comprehensive data protection laws in the country. This legislation aims to address digital personal data protection compliance by establishing clear guidelines and safeguards for how individuals' information is handled in the digital age.

As India continues to advance technologically, the importance of this act cannot be overstated, as it seeks to strike a balance between the convenience of digital services and the imperative to protect the privacy and security of citizens' personal data.

What is the India DPDP Act?

The DPDP act or law is a comprehensive framework aimed at safeguarding the privacy and security of the personal information of Indian citizens while promoting the growth of the digital economy. Any business based in India or operating from a foreign location – that processes the personal data of Indian citizens to offer them goods or services – will come under the purview of this law, which will govern how they collect, process, store, and share their customers' personal information. The new law will give individuals greater control over their data and establish strict regulations for data protection.

To comply with the DPDP Act (DPDPA), organisations are required to take the following steps:

- Determine applicability to their operations.
- Build a data inventory and data map to track personal data.

- Implement necessary technical and organisational measures for data protection.

How can we help you?

At TÜV SÜD, our constant endeavour has been to identify our customers' business needs and help them quickly address them. Our highly skilled workforce foresaw the challenges the Digital Personal Data Protection Law might bring.

With our Digital Personal Data Protection Act (DPDPA) service, we assist organisations in ensuring that they adhere to stringent data protection laws and regulations, safeguarding both their reputation and their customers' sensitive information.

Our robust and intuitive data privacy management service helps businesses and government entities discover, categorise, and identify sensitive information scattered throughout their resources. Our DPDPA service also helps manage requests from data subjects to ensure total compliance with data privacy regulations like the Digital Personal Data Protection law and avoid hefty penalties.

- **Gap Assessment:** Determine the current state of DPDPA for the organisation & identify gaps & risks.
- **DPDPA Roadmap & Implementation Consulting:** Help the organisation to formulate the policies & SOPs required for DPDPA compliance requirements.
- **Annual Compliance Validation:** Reassess the organisation's compliance against DPDPA current requirements.
- **DPDP Training:** General DPDPA awareness training for all employees and tailored trainings for individual

business functions (HR, Admin, Sales, Finance, Travel desk etc.) handling DPDPA scoped personal data.

- **Data Audit for Significant Data Fiduciary:** Audit of policies and processing.

Your business benefits

- **Safeguard reputation and maintain customer trust:** Protect customers' sensitive information by adhering to stringent data protection laws and regulations.
- **Enhanced data cognition:** Maintain 360-degree visibility into your data privacy posture with parameterised deep scans of multiple data sources per the organisation's data protection policies.
- **Intuitive data compliance:** Ensure data compliance with support for global and local data privacy regulations (including DPDPA, GDPR, Singapore PDPA, and CCPA).

Why choose TÜV SÜD?

As a globally trusted service provider, TÜV SÜD offers comprehensive data protection compliance and data privacy management services. Our expertise in cybersecurity and data protection compliance are unmatched, making us a trusted choice for businesses seeking to navigate the complex landscape of data privacy regulations.

We have a team of certified privacy professionals with vast experience in data protection assignments like EU-GDPR, Singapore PDPA and CCPA etc. We can help you in your data protection journey, privacy framework, impact assessment and flexible resource models.

- Benefit from our experience of working with over 270+ clients globally for data protection services alone in the past year.
- Creditability of TÜV SÜD as an independent and impartial auditor.
- Acceptance of TÜV SÜD validation across the globe.
- TÜV SÜD not only assesses and implements the current state, but it also prepares you for your future vision & growth.

Add value. Inspire trust.

TÜV SÜD is a trusted partner of choice for safety, security and sustainability solutions. It specialises in testing, certification, auditing and training services. Through more than 26,000 employees across over 1,000 locations, the company adds value to customers and partners by enabling market access and managing risks. By anticipating technological developments and facilitating change, TÜV SÜD inspires trust in a physical and digital world to create a safer and more sustainable future.
