## Course Objectives

- Explain how AI enhances enterprise applications
- Recognize the shift in value to applications and integrated processes
- Describe SAP's Autonomous Enterprise vision
- Explore human–AI collaboration and cross-domain orchestration

## Table of Contents

### **Module 1: Introducing Autonomous Enterprise**

- Reimagining SaaS in the Age of AI – SAP’s Evolution

### **Module 2: Introducing Joule and the new Engagement Layer**

- Getting to Know Joule
- Joule Work

### **Module 3: Discovering SAP Autonomous Suite**

- Exploring SAP Autonomous Suite
- Exploring Autonomous Domain Blueprints

### **Module 4: Extending Business Value with Industry AI**

- Discover Industry AI applications with built-in vertical process knowledge, data models, and regulatory logic

### **Module 5: Exploring the Key Components of SAP Business AI Platform**

- Introducing SAP Business AI Platform

### **Module 6: Introducing Autonomous Suite**

- Exploring SAP’s Vision for the Autonomous Enterprise Across SAP’s Suite of Solutions
- Discovering the SAP Autonomous Suite

### **Module 7: Positioning SAP Autonomous HCM**

- Discovering Autonomous HCM
- Navigating the Autonomous HCM Architecture and Portfolio

### **Module 8: Positioning SAP Autonomous Finance**

- Discovering Autonomous Finance
- Navigating the Autonomous Finance Architecture and Portfolio

### **Module 9: Positioning SAP Autonomous CX**

- Discovering Autonomous CX
- Navigating the Autonomous CX Architecture and Portfolio

### **Module 10: Positioning SAP Autonomous Spend**

- Discovering Autonomous Spend
- Navigating the Autonomous Spend Architecture and Portfolio

**Module 11: Positioning SAP Autonomous Supply Chain Management**

- Discovering Autonomous Supply Chain Management (SCM)
- Navigating the Autonomous SCM Architecture and Portfolio
