

Atlassian Certified Confluence Administrator for Data Center and Server Exam Prep

Course Introduction:

The Atlassian Certified Confluence Administrator for Data Center and Server Exam Prep (ACP-200) is designed to equip learners with the knowledge and skills necessary to effectively manage and optimize Confluence environments. This course will guide you through all essential aspects of Confluence administration, preparing you to handle complex scenarios and common challenges faced by administrators. By the end of this course, you will be ready to tackle the ACP-200 certification exam with confidence.

Module 1: Introduction to Confluence Administration

- **Overview of Confluence Data Center and Server:** Understand the fundamental differences and benefits of using Confluence Data Center and Server.
- **Role of a Confluence Administrator:** Explore the responsibilities and expectations for Confluence administrators within an organization.

Module 2: Installation and Setup of Confluence

- **Pre-installation Considerations:** Learn the necessary prerequisites and system requirements for installing Confluence.
- **Installing Confluence:** Step-by-step guide to installing Confluence on your server, including initial configuration settings.
- **Post-installation Configuration:** Configure essential settings such as base URL, language, and timezone.

Module 3: User Management and Permissions

- **Creating and Managing Users:** Master the techniques for adding, editing, and deleting users in Confluence.
- **Understanding Group and Space Permissions:** Learn how to configure and manage permissions for groups and spaces to ensure secure content access.

- **Advanced Permission Schemes:** Dive into advanced permissions settings to handle complex user scenarios.

Module 4: Space Administration

- **Creating and Managing Spaces:** Learn how to create, configure, and organize spaces to optimize content management.

- **Space Permissions and Restrictions:** Understand the intricacies of assigning permissions and restrictions within spaces.

Module 5: Content Management

- **Page and Blog Management:** Develop skills for creating, editing, and organizing pages and blogs within Confluence.

- **Content Restrictions and Versioning:** Master the use of content restrictions and version control to maintain content integrity.

Module 6: Confluence Macros and Blueprints

- **Using Macros to Enhance Content:** Explore the various macros available in Confluence and their applications for dynamic content creation.

- **Implementing Blueprints for Standardization:** Learn how to use blueprints to standardize and streamline content creation processes.

Module 7: Confluence Customization and Optimization

- **Customizing the Look and Feel:** Understand how to customize themes, layouts, and styles to align with organizational branding.

- **Performance Optimization and Scaling:** Explore best practices for optimizing Confluence performance and scaling for larger environments.

Module 8: Troubleshooting and Maintenance

- **Common Troubleshooting Techniques:** Gain insights into identifying and resolving common issues faced by Confluence administrators.

- **Regular Maintenance Tasks:** Learn the routine maintenance tasks necessary to ensure the smooth operation of your Confluence environment.

Module 9: Confluence Integrations and Extensions

- **Integrating Confluence with Other Tools:** Discover how to integrate Confluence with other Atlassian products and third-party applications.

- Exploring Marketplace Apps: Learn about the Atlassian Marketplace and how to extend Confluence functionality with various plugins.

Module 10: Preparing for the ACP-200 Exam

- Exam Overview and Structure: Familiarize yourself with the format and structure of the ACP-200 certification exam.

- Study Tips and Resources: Get valuable study tips and resources to prepare effectively for the exam.

- Practice Questions and Mock Exam: Test your knowledge with practice questions and engage in a comprehensive mock exam to assess your readiness.

Conclusion:

This course provides a comprehensive pathway to mastering Confluence administration, ensuring that you are well-prepared to achieve certification and effectively manage Confluence environments in real-world scenarios.
