

"Atlassian Certified: Managing Jira Projects for Cloud Exam Prep"

Course Introduction:

The "Atlassian Certified: Managing Jira Projects for Cloud Exam Prep" course is designed to equip professionals with the knowledge and skills required to effectively manage Jira projects in a cloud environment. This course offers a deep dive into Jira's functionalities, project management principles, and best practices, ensuring that participants are well-prepared to pass the certification exam and excel in their roles. By the end of this course, participants will have a comprehensive understanding of Jira's cloud-based environment, enabling them to implement and manage projects efficiently.

Module 1: Introduction to Jira Cloud

- Understanding Cloud-Based Jira: Explore the benefits and differences of using Jira in a cloud environment versus on-premises.
- Navigating the Jira Cloud Interface: Gain familiarity with the user interface, including dashboards and navigation panels specific to the cloud version.
- Jira Cloud Licensing and Pricing: Learn about different licensing options and pricing models for Jira Cloud.

Module 2: Jira Project Management Fundamentals

- Introduction to Projects in Jira: Understand what constitutes a project in Jira and how to initiate one.
- Configuring Project Settings: Learn to configure essential project settings to align with organizational needs.
- Managing Project Roles and Permissions: Establish roles and set permissions to ensure secure and efficient project management.

Module 3: Issue Management and Workflows

- Creating and Configuring Issues: Master the process of creating issues and configuring their settings to suit project requirements.
- Understanding Jira Workflows: Delve into workflow structures and learn how to customize

them to match project processes.

- **Advanced Workflow Customization:** Explore advanced options for automating tasks and transitions within workflows.

Module 4: Agile Methodologies in Jira

- **Introduction to Agile in Jira:** Understand how Jira supports agile methodologies like Scrum and Kanban.

- **Setting Up Scrum Boards:** Learn the steps to create and configure Scrum boards for effective sprint management.

- **Implementing Kanban Boards:** Discover how to set up and customize Kanban boards to manage continuous workflows.

Module 5: Configuring Jira for Teams

- **Team Management and Collaboration:** Explore tools and features that enhance team collaboration within Jira Cloud.

- **Customizing Dashboards and Gadgets:** Learn to tailor dashboards with gadgets to provide insights and track project progress.

- **Notifications and Alerts Management:** Set up notifications and alerts to keep team members informed and engaged.

Module 6: Reporting and Analytics

- **Generating Reports in Jira:** Understand how to generate and interpret various reports to track project performance.

- **Utilizing Jira Software Reports:** Gain insights into software-specific reports and how they can inform decision-making.

- **Leveraging Advanced Roadmaps:** Learn to use Advanced Roadmaps for strategic planning and visualization of project timelines.

Module 7: Jira Administration and Maintenance

- **Introduction to Jira Administration:** Familiarize yourself with the administrative responsibilities and tasks in Jira Cloud.

- **Managing Jira Instances:** Explore the best practices for managing multiple Jira instances effectively.

- **Backup and Recovery in Jira Cloud:** Learn the procedures for securing data through backups and recovery strategies.

Module 8: Preparing for the Certification Exam

- Review of Exam Objectives: Recap the key topics and objectives covered in the certification exam.
- Exam Strategies and Tips: Discover strategies to tackle the exam confidently and efficiently.
- Practice Questions and Case Studies: Engage with practice questions and real-world scenarios to solidify understanding and readiness.

Course Conclusion:

Upon completion of this course, participants will be fully prepared to take the "Atlassian Certified: Managing Jira Projects for Cloud" exam. They will have gained not only the theoretical knowledge but also practical skills to manage Jira projects effectively in a cloud environment, positioning themselves as valuable assets to any organization leveraging Jira for project management.
