

# PMI Agile Hybrid Project Pro

## 5-Day Training Program

### Course Overview

A premium 5-day instructor-led program aligned with the PMI Agile Hybrid Project Pro Micro-Credential examination domains: People, Process and Business Environment. The program combines Agile principles, Hybrid delivery models, practical workshops and exam readiness.

| Day | Module                           | Key Topics                                                                                                                    | Learning Outcome                                                                                                                                |
|-----|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
