

Cilium in Action: Kubernetes Security & Insight (LFWS315)

Course Duration: 8 Hours

TOC

Introduction

- The Linux Foundation
- The Linux Foundation Training
- The Linux Foundation Certifications
- The Linux Foundation Digital Badges
- The Linux Foundation Subscriptions
- Laboratory Exercises, Solutions and Resources
- Things Change in Linux and Open Source Projects
- Platform Details

Kubernetes Fundamentals Review

- Kubernetes Architecture
- Control Plane
- Data Plane
- API Objects
- Labs

Network Fundamentals

- Network Functions
- Pod Network
- Why CNI
- CNI Features
- Install CNI
- Pod IP Address
- IP Transience
- Labs

Getting Started with Cilium

- Cilium Overview
- eBPF
- Component Overview
- Labs

Network Observability

- Need for Observability

- Hubble
- Why Hubble
- Architecture
- Components
- Labs

Network Policy

- Network Policies
- Cilium Network Policy
- Kubernetes Network Policy vs Cilium Network Policy
- Labs

Cilium Gateway API

- Kubernetes Services Limitations
- Ingress
- Cilium Service Mesh
- Gateway API
- Cilium Gateway API
- Labs

Mutual Authentication

- Mutual Authentication
- Mutual Authentication in Cilium
- Identity Management
- SPIFFE Benefits
- Labs

Cilium Transparent Encryption

- Need for Encryption
- Cilium Encryption
- IPsec Encryption
- WireGuard

- Labs

Cilium Cluster Mesh

- Why Cluster Mesh
- Fault Resilience
- Cluster Mesh Architecture
- Requirements
- Global Services

Closing and Evaluation Survey

- Evaluation Survey
