

IBM PowerVC Workshop

OEM: IBM • Duration: 4 Days (32 hrs) • Code: QZC30G

COURSE MODULES & TOPICS

Objectives

- Analyze IBM PowerVC architecture, OpenStack integration, key features, and benefits
- Evaluate IBM PowerVC planning requirements for compute, storage, networking, security, and performance
- Implement IBM PowerVC installation, upgrade, configuration, and resource registration
- Demonstrate IBM PowerVC graphical and command-line administration tasks
- Administer users, projects, roles, images, virtual machines, storage, networks, logs, backup and restore, and placement policies
- Analyze cloud computing concepts and how they apply to IBM PowerVC private and hybrid cloud environments
- Manage virtual machine images, deployments, lifecycle operations, and cloud-init requirements
- Analyze, plan, install, and integrate IBM PowerVM NovaLink with IBM PowerVC
