

Line of Business Analytics with Oracle Analytics Cloud 2026

Table of Contents

Lesson 1.1: Discover Insights and Visualize Data with Oracle Analytics AI Assistant

Objectives

What is the Oracle AI Assistant?

Artificial Intelligence (AI)

AI Concepts

How Does it Work?

Security Considerations

Set Up and Configure Your Dataset

Set Up and Configure a Subject Area

Tuning Your Metadata for AI

Tuning Your Data for Natural Language

Summary

Lesson 1.2: AI Assistant on Mobile in Oracle Analytics

AI Assistant on Mobile in Oracle Analytics

Lesson 1.3: Oracle Analytics Cloud AI Agents

Objectives

What are OAC AI Agents?

Oracle Analytics AI Agent: What Really Happens When You Ask a Question?

When to Use an Agent?

Create an OAC AI Agent

OAC AI Agent Setup

What Datasets Can Be Used in an AI Agent?

Configure Your Dataset Within the Agent

File Format Considerations for Using Knowledge Documents

Overall Guidance

Summary

Lesson 1.4: Configure the Oracle Analytics Cloud MCP Server with AI clients

Objectives

Describe the Model Context Protocol (MCP)

- Model Context Protocol (MCP)

- Model Context Protocol (MCP) - Architecture

- Model Context Protocol (MCP) – Terminology

Explain the Architecture of the Oracle Analytics MCP Server

- Oracle Analytics MCP Server - Architecture

Explain the Setup of the Oracle Analytics MCP Server

- Oracle Analytics MCP Server - Setup

Describe the Process of Using MCP Hosts/Clients

- Using MCP Hosts/Clients

Summary

Lesson 2: Oracle Analytics Cloud Overview

Objectives

Product STRATEGY

Oracle Analytics - Comprehensive Analytics Platform

Oracle Analytics Cloud: Comprehensive Platform for Business Analysts and IT

Oracle Analytics Converged Analytics: Platform for Any Data, Any Role, and Any Device

Oracle Analytics: Driving business transformation by accelerating the journey from data to insight to action

Oracle Analytics Strategy

Oracle Analytics: Products

Oracle Analytics Cloud

Oracle Analytics Server

Single Product, Multiple Deployment Options

Fusion Analytics Warehouse

Oracle Fusion Analytics Warehouse - Extensibility

Readily available services to advance your analytics

Oracle Analytics: Platform

Deploy with ease

Open connectivity

Data preparation

Data Enrichment

Augmented Enrichment

Data flows

Built-in data flow operations

Sequences

Data Replication

Data Replication Connection

Data Replication

Data Replication Flow

Unified search

Natural Language Generation

Graph analytics

Text Analytics

Machine Learning

Analytics Cloud – Complete Platform for Managed Data Discovery

Easily Extensible by App Developers

Mobile analytics

Collective Intelligence with Day by Day

Modernizing your Analytics: A Path to the cloud

A unified analytics platform

Lesson 3.1: Data Visualization Overview

Agenda

Data Visualization

Empower Users with Granular Control: Fine-Grain Permissions in Oracle Analytics Cloud (OAC)

Business Challenge

Business Solution

Fine-Grain (Standalone) Permissions: Introduction

Predefined OAC Application Roles

Fine-Grain (Stand-alone) Permissions

OAC: Permissions

Benefits of Fine-Grain Permissions

Get Started with Fine-Grain Permissions

Fine-Grain Permission

Get Started with Fine-Grain Permissions

New Unified Home Page

Data Connectors

Data Sets

Multi Table Data Sets

Self-Service data modelling with Data Sets

Data Sets – Deep Dive

Sequence of adding tables to a data set

Data Sets for cross fact table analysis

Joins on transformed and enriched columns

Table Options that influence Query Generation

Preserve Grain

Create Workbook & Add Data Set to a Workbook

OAC Auto Insights

OAC Auto Insights : experience flow

Notes about Auto Insights

Augmented Analytics in Action

Visual Grammar

Visualizations

Pattern Brushing

Data Actions

Map Configuration

Map Backgrounds

Map Layers

Digitized Map Layers

Natural Language Queries and Narratives

Create Calculations

Create Filters

Enhancements in Present Mode

Share a Workbook URL with Persisted Filter Values

What are Parameters?

Parameters

Benefits of Using Parameters

Parameters Basics

Parameters: Scope

Parameters: Filters

Parameters: Values

Parameters: System Parameters

Creating and Defining Parameters

Parameters

Parameters: Definition

Parameters: Syntax

Using Parameters in Workbooks

Parameters: Usage

Bind a Parameter to a Request Variable

Use a Parameter as a Filter to Show or Hide Visualizations

Working with Time Series Functions in Oracle Analytics Cloud (OAC) Workbooks

AGO

TODATE

PERIODROLLING

Time Series Functions in Oracle Analytics Cloud (OAC) Workbooks and Subject Areas

Time Series Functions in Oracle Analytics Cloud (OAC) and Subject Areas

Time Series Functions in Oracle Analytics Cloud (OAC) Workbooks and Subject Areas

Share workbooks using Email Schedules

Prerequisites: Oracle Cloud Infrastructure (OCI)

Prerequisites: Oracle Analytics Cloud (OAC)

Workbook Email Scheduler Overview

Workbook Email Scheduler: Enable Preview Feature

Workbook Email Scheduler Overview

Workbook Email Scheduler Scheduling

Workbook Email Scheduler: Bursting

Schedule and Job History

Schedule and Job History: Job Manager

Schedule and Job History: Workbook

What are Watchlists

What are Watchlists?

Create a Watchlist

Manage Watchlists

What are Canvas Properties?

Introduction

Layout options

Layout options - Auto Fit

Layout options - Freeform

Layout options - Width and Height

Layout options - Grid Guidelines

Brushing

Brushing Best Practices

Other Canvas Properties

Synchronize Visualizations

Data Refresh

Background

Design Canvas Layouts for Different Screen Sizes

What is a Vanity URL?

Introduction

Set Up a Vanity URL

Typical Workflow to Set Up a Vanity URL

1. Understand the prerequisites for a vanity URL
2. Configure a vanity URL (using the Console)
3. Update security certificates for the vanity domain
4. Remove a vanity URL

Localize the User Interface for Data Visualization

Localize Data Visualization User Interface Display Language

Localize Data Visualization Regional Data Formats

Workbook Data Format Changes When You Select a Different Locale

Administer OAC instances using Console

Administer OAC instances using Console - Reference Knowledge

Administer OAC instances using Console - System Knowledge

- Administer OAC instances using Console - Custom Knowledge
- Administer OAC instances using Console
- Share Connections, Datasets, Workbooks in Oracle Analytics
- Perform custom aggregation using Grammar Panel and Calculation
- Create and Share a Custom Page in Oracle Analytics
- Providing Custom Groups of Content
- Workbook Themes
- Selection Steps
- Hide Columns in Visualizations
- Gauge Visualizations
- Create a Custom Workbook State
- Apply Conditional Formatting

Lesson 3.2: Dataset Features

- Objectives
- Dataset-level Filters
- LLM-based Column Beautification
- Change the Database Connection for Dataset Tables
- Specify if a Dataset Table is Extracted
- Add Dates as Custom Knowledge
- Summary

Lesson 4: Oracle Analytics: Augmented Analytics in OAC

- Objectives
- Augmented Analytics in OAC: Introduction to Augmented Analytics
 - Introduction to Augmented Analytics
 - Gartner
 - Introduction to Augmented Analytics

Oracle Analytics

BI ASK

Augmented Analytics in OAC: Data Preparation Recommendations

Data Preparation Flow

Augmented Data Preparation

Oracle Analytics

Narrative Generation

Oracle Analytics

Use Contextual Insights to Understand Your Data

Summary

Lesson 5: Oracle Analytics Cloud: Administration and Security

OCI Fundamentals - OCI IAM

IDCS / OCI Prerequisites

Plan Your OAC Service

6 Facts to Know Before Creating an OAC Instance

OAC Create Instance

OAC Create Instance: OCI Console Click-Through

Connect to OAC - Authentication

Connect to OAC – Architecture Overview

Connect to OAC – Authorization (Pre-Defined Application Roles)

Connect to OAC – Authorization (User-Defined Application Roles)

Secure Access to the Objects in Semantic Model

Data (Row) Level Security

Securing Access to the Objects in Semantic Model

Data (Row) Level Security (user's association to data)

Data (Row) Level Security

- Secure Presentation Services Privileges
- Determine User's Privileges & Permissions with Application Roles
- Manage Content
- Additional Fine Grain Permissions
- Summary

Lesson 6.1: Advanced Analytics and Machine Learning: Overview

- Agenda
- Data flows
- Use case
- Advanced Analytics - Overview
- Advanced Analytics Functions in Oracle Analytics
- Oracle Analytics Cloud – Advanced Analytics
- Advanced Analytics with Data Flow
- Using Subject Areas as Sources in Data Flows

Lesson 6.2: Similarity Analysis

- Performing Similarity Analysis in Oracle Analytics
- How Does it Work?
- Prerequisites to Performing Similarity Analysis in Oracle Analytics
- (Similarity Analysis) Data Flow
- Configure the Similarity Analysis node
- Performance Considerations
- Visualizing the results in Oracle Analytics Cloud (OAC)
- Summary

Lesson 7.1: Machine Learning with Oracle Analytics

- Agenda
- Introduction: Machine Learning (ML)

Introduction: ML with Oracle Analytics (cont'd)
Introduction: ML – Typical workflow in Oracle Analytics
Build Machine Learning Model Train the Model
Build ML Model
Inspect the ML Model Review the Model created
Review Model Quality and Related Data
Make your prediction Apply/Score a Model
Use ML Model to make Prediction
Analyze Prediction Results Dynamic Analysis of Model output
Add Scenario for Analysis only
What are Oracle Analytics Predictive Models?

Lesson 7.2: OCI Cloud Services

Objectives
What are Oracle Analytics Predictive Models?
What Machine Learning and Artificial Intelligence Services Does Oracle Analytics Support?
Use Oracle Cloud Infrastructure Data Science Models in Oracle Analytics
Using OCI Functions in Oracle Analytics
Use OCI Language Models in Oracle Analytics
Apply an OCI Language Model to a Dataset
Use Oracle Cloud Infrastructure Vision Models in Oracle Analytics

Lesson 8: Modern Data Visualization

Agenda
Oracle Mobile: Mobile Trends
 Mobile Trends
Oracle Mobile: Landscape
 Oracle Analytics Cloud: Anywhere...

- OA Landscape

- Oracle Mobile: Mobile Web Browser

- Mobile Web Browser

- Mobile Web Browser vs Mobile Browser

- Oracle Mobile: Oracle Analytics Mobile

- OA Mobile

- OA Mobile - Demo

- Desktop Browser vs Mobile Browser vs OA Mobile

- Desktop Browser vs OA Mobile

- OA Mobile – Listen Podcast

- Oracle Mobile: Oracle Day by Day

- Oracle Day by Day

- BI ASK

- How does it work?

- Best Fit Algorithm?

- Oracle Day by Day

- Oracle Day by Day - Demo

- Desktop Web Browser vs Oracle Day by Day

- Summary – not one size fits all

Lesson 9.1: Data Visualization Performance Tips

- Objectives

- Introduction

Lesson 9.2: Oracle Analytics: Design Tips

- Design Tips

Lesson 9.3: Oracle Analytics: Analyze OA Usage and Diagnostic Logs using OCI Logging Service

- Objectives

- Access Oracle Analytics Cloud (OAC) Logs with Oracle Cloud Infrastructure (OCI) Logging

Introduction

Log Categories

Enable Logs for the OAC resource

Enable Logs for the OAC resource: Prerequisites

Create a Log Group

Create a Log Group Audit Log

Create a Log Group Diagnostic Log

Create a Log Group Audit / Diagnostic Log

Summary

Lesson 9.4: Oracle Analytics: Troubleshooting and Monitoring Tips

Troubleshooting and Monitoring Tips

Lesson 9.5: Oracle Analytics: Performance Considerations

Performance Considerations
