

Contents

1-1 Oracle Multicloud Solution

- Multicloud
- Oracle Multicloud Solution
- Oracle Multicloud Partners

2-1 Oracle Database@Google Cloud - Overview

- Oracle and Google Cloud Partnership
- Oracle and Google Cloud Partnership Offering
- Oracle Database@Google Cloud
- Oracle Database@Google Cloud Easy Adoption
- Operational Responsibilities
- Regional Availability

2-2 Oracle Database@Google Cloud - Architecture

- Detailed Component Architecture
- Control Plane Architecture

2-3 Supported Oracle AI Database Services

- Oracle Autonomous AI Database
- Autonomous AI Database Workload Types
- Autonomous AI Database (Serverless) Management Model
- Autonomous AI Database (Serverless) Responsibility Matrix
- Exadata Database Service
- Exadata Database Service in Dedicated Infrastructure
- Exadata Database Service in Exascale Infrastructure
- Exadata Database Service Cloud Management Model
- Exadata Database Service Responsibility
- Oracle Base Database Service in OCI
- Oracle Base Database Service Management Model
- Oracle Autonomous Recovery Service

2-4 Oracle Database@Google Cloud - User Journey

User Journey

3-1 Oracle Database@Google Cloud - Onboarding Prerequisites

Onboarding Oracle Database@Google Cloud
Onboarding Prerequisites
Google Cloud Project & Google Billing Account
OCI Account for linking
To wrap up...
Onboarding Oracle Database@Google Cloud
Purchase - Private Offer
Purchase - Public Offer
Configuration

3-2 Oracle Database@Google Cloud - Onboarding Process Workflow

Onboarding Oracle Database@Google Cloud
Purchase Offer
Purchase - Private Offer
Purchase - Public Offer (Standard Offer)
Available OCI Database Services based on Purchase Option
Configuration

3-3 Oracle Database@Google Cloud - Role - Based Access Control

Control User Access to OD@GCP Resources
Google Cloud RBAC for Autonomous AI Database Service
Google Cloud RBAC for Exadata Database on Exascale Infrastructure
Google Cloud RBAC for Exadata Database on Dedicated Infrastructure

3-4 Oracle Database@Google Cloud - Multicloud Resources created in OCI during account linking

Multicloud Resources created in OCI
OCI Multicloud Compartment
OCI Identity and Access Management Policies

4-1 ODB Network

ODB Network
Provisioning of ODB Network
ODB Subnets

4-2 Domain Name System Configuration

- Domain Name System in Oracle Database@Google Cloud
- DNS Resolution Configuration at Google Cloud End
- DNS Resolution Configuration at OCI End
- DNS Resolution Workflow

4-3 Networking Topologies

- Single VPC - Multiples Subnets
- Multiple VPC
- VPC Peering
- Shared VPC Peering
- Hub-and-Spoke Topology using network virtual appliance (NVA)

5-1 Provision OCI Database Service - Prerequisites

- Prerequisites

5-2 Provisioning OCI Database Services in Oracle Database@Google Cloud

- Recap: Network Requirement for Database Service in OD@GCP
- IP Consumption Scenario in OD@GCP
- Provision Oracle Autonomous AI Database (Serverless)
- Provision ExaDB –D in OD@GCP
- Provision Oracle Exadata Infrastructure
- Provision Oracle Exadata VM Cluster
- Provision ExaDB –XS in OD@GCP
- Provision Oracle Exascale VM Cluster
- Provision Oracle Exadata Database
- Provision Oracle Base Database
- Provision Oracle Base Database – Default Backup Settings

6-1 Manage OCI Exadata Infrastructure in Oracle Database@Google Cloud

- Manage Exadata Infrastructure in Oracle Database@Google Cloud
- Manage Exadata VM Cluster in Oracle Database@Google Cloud
- Manage Exascale VM Cluster in Oracle Database@Google Cloud

6-2 Manage OCI Database Service in Oracle Database@Google Cloud

- Manage Autonomous AI Database in Oracle Database@Google Cloud
- Manage Exadata/Exascale Database Service in Oracle Database@Google Cloud
- Manage Base Database Service in Oracle Database@Google Cloud

7-1 Oracle Database@Google Cloud – Database Backup Destinations and Prerequisites

Database Backup Destinations For Oracle Database@Google Cloud

Prerequisites for using Autonomous Recovery Service

Prerequisites for using OCI Object Storage

7-2 Oracle Database Autonomous Recovery Service

Autonomous Recovery Service (RCV)

Support and Configuration Requirements

Backup And Recovery Strategy

Database Backup Protection in RCV

7-3 Oracle Database@Google Cloud – Backup And Restore Autonomous AI Database

Backup Autonomous AI Database

Restore Autonomous AI Database

7-4 Oracle Database@Google Cloud – Backup And Restore ExaDB-D

Backup Exadata Database Service

Automatic Backup

Restore the Database using OCI console

7-5 Oracle Database@Google Cloud – Backup And Restore ExaDB-XS Service

Backup Exascale Database Database Service

Automatic Backup

Restore the Database using OCI console

7-6 Oracle Database@Google Cloud – Backup And Restore BaseDB Service

Backup Exascale Database Service

Automatic Backup

Restore the Database using OCI console

8-1 High Availability in Oracle Database@Google Cloud

Oracle Database Foundational High Availability Architecture

OCI Autonomous Recovery Service (RCV)

High Availability in Exadata Database Service

High Availability in Autonomous AI Database Serverless

8-2 Disaster Recovery in Oracle Database@Google Cloud

Oracle Active Data Guard

Cross-region Disaster Recovery for Oracle ExaDB Service in
Oracle Database@Google Cloud

Cross-region Network Traffic Options for Disaster Recovery in
Oracle Database@Google Cloud

Disaster Recovery for Autonomous AI Database Serverless in
Oracle Database@Google Cloud

Disaster Recovery for Base Database Service in Oracle
Database@Google Cloud

9-1 Zero-Downtime Migration: Overview

ZDM Features

ZDM Supported Environment

ZDM – How It Works

9-2 ZDM Intermediate Storage Options in Oracle Database@Google Cloud

ZDM Intermediate Storage Options in Google Cloud

NFS on Oracle Advanced Cluster File System (ACFS)

NFS Server on Google Compute Engine VM

NFS on Google Filestore

9-3 ZDM Physical Offline Migration to ExaDB-D/BaseDB on Oracle Database@Google Cloud

ZDM Physical Offline Migration to ExaDB-D/BaseDB on
Oracle Database@GCP

ZDM Physical Offline Migration to ExaDB-D/BaseDB on
Oracle Database@AWS

9-4 ZDM Physical Online Migration to ExaDB-D/BaseDB on Oracle Database@Google Cloud

ZDM Physical Online Migration to ExaDB-D/BaseDB on
Oracle Database@GCP

10-1 Monitoring Resources in Oracle Database@Google Cloud

Monitoring Resource Metrics Using Google Cloud Observability

Oracle Database@Google Cloud Resource Audit Logs

Metrics Monitored

11-1 Oracle Database@Google Cloud – Data Protection

Database Encryption (TDE) Methods

Database Encryption at Rest (TDE) Methods

Database Encryption in Transit (TLS/mTLS) Methods

11-2 Oracle Database@Google Cloud – Security

Security in Oracle Database@Google Cloud
