

Forescout Certified Associate — 3-Day Training TOC

Day 1 — Foundations, Architecture & Installation

- 1. Introduction**
 - Forescout Platform overview
 - NAC concepts and use cases
 - Visibility, classification, compliance and control
- 2. Terms & Architecture**
 - Forescout components and terminology
 - Appliance, Console, Enterprise Manager
 - Plugins, channels, segments and network architecture
- 3. Platform Installation**
 - Initial appliance configuration
 - Network, DNS and NTP configuration
 - Switch and Active Directory integration
- 4. Console Overview**
 - Console navigation
 - Host discovery and host properties
 - Monitoring and administration basics

Day 2 — Configuration, Deployment, Policy & Classification

- 5. Platform Configuration**
 - Plugins and channels
 - Host Property Scanner
 - Switch Observe
 - Platform configuration options
- 6. Platform Deployment**
 - Deployment planning
 - Layer 2 and Layer 3 deployment
 - Network integration and rollout strategy
- 7. Policy Overview**
 - Policy structure and conditions
 - Detections and actions
 - Policy testing and validation
- 8. Classification**
 - Host and device classification
 - Endpoint types and properties
 - Classification policies and validation

Day 3 — Clarification, Compliance, Control & Operations

- 9. Clarification**
 - Host management capabilities
 - Endpoint clarification
 - Windows, Linux and network devices
- 10. Compliance**
 - Endpoint and network compliance
 - Compliance policies

- Security posture assessment
- 11. Control & Enforcement**
 - Alerts and notifications
 - VLAN and ACL enforcement
 - Remediation and ActiveResponse
 - Guest and DNS enforcement
- 12. Host Management & Monitoring**
 - Windows, Linux and network endpoint management
 - Host monitoring and policy detections
 - System housekeeping
- 13. Administration & Troubleshooting**
 - User and role management
 - Appliance administration
 - Logs, plugins and system health
 - Common discovery, policy and enforcement issues
- 14. Hands-on Labs & Final Review**
 - End-to-end NAC scenario
 - Discover → Classify → Clarify → Compliance → Control
 - Troubleshooting exercises
 - Final review and knowledge assessment
