

Dell PowerProtect Data Manager Implementation and Administration

OEM: Dell EMC • Code: ESDPSS02373

COURSE DESCRIPTION

This course explains and demonstrates the deployment, configuration, and integration of Dell PowerProtect Data Manager with Windows and Linux file system, Microsoft Exchange, Microsoft SQL, Kubernetes, NAS, Oracle, SAP HANA, and VMware virtual machines. It describes various databases backup and restore operations with PowerProtect Data Manager. This course includes labs to reinforce these skills through exercises.

AUDIENCE PROFILE

- This course is intended for customers, partners, and Dell field support, deploy and remote support.

PREREQUISITES

- The student must have the following knowledgebase:
- Basic enterprise application backup and restore concepts.
- Basic Microsoft Exchange and SQL database administration.
- Basic Oracle database and SAP HANA database administration.
- Basic Kubernetes cluster concepts.
- VMware vSphere administration.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Upon successful completion of this course, participants should be able to:
- Summarize PowerProtect Data Manager with various databases integration features.
- Describe PowerProtect Data Manager with databases integration and configuration steps.
- Describe databases backup and restore workflows with PowerProtect Data Manager.

COURSE OUTLINE

Module 1: Course Outline

- PowerProtect Data Manager Concepts.
- PowerProtect Data Manager Features.
- PowerProtect Data Manager Administration.
- PowerProtect Data Manager Implementation.
- PowerProtect Data Manager File System Integration.
- PowerProtect Data Manager Kubernetes Integration.
- PowerProtect Data Manager Microsoft Exchange Integration.
- PowerProtect Data Manager Microsoft SQL Integration.
- PowerProtect Data Manager NAS Integration.
- PowerProtect Data Manager Oracle Integration.
- PowerProtect Data Manager SAP HANA Integration.
- PowerProtect Data Manager VM Integration.
- PowerProtect Data Manager Troubleshooting.
- PowerProtect Data Manager Upgrade.
