

Prepare for your Technical Architect Certification (CTA601)

OEM: Salesforce • Code: CTA601

COURSE DESCRIPTION

Discover how to boost your exam readiness and gain the confidence you need to continue working toward your Salesforce Certified Technical Architect (CTA) certification. In this 3-day CTA instructor-led course, learn how to build solutions and create artifacts that address real-world customer requirements, using hypothetical scenarios from previous Architect Review Board exams. Reinforce your knowledge of Salesforce Platform features and functionality by reviewing exam objectives and maximize your success on the Architect Evaluation and Architect Review Board Exam.

AUDIENCE PROFILE

- This course is designed for experienced Salesforce architects who are actively preparing to earn their Salesforce Certified Technical Architect certification by passing the Architect Evaluation and Architect Review Board Exam. Students must hold their Salesforce Certified Application Architect and Salesforce Certified System Architect certifications prior to attending this course, and should feel comfortable with all concepts covered in the Salesforce Certified Technical Architect Exam Guide.

PREREQUISITES

- Please Note: Students should attend this course at least four months before they plan to register for the Architect Evaluation so they can apply course concepts to their exam preparations.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- When you complete this training, you will be able to:
- Recall exam objectives for the Architect Evaluation and Architect Review Board Exam.
- Discuss Salesforce Platform features and functionality that are covered on the exam.
- Apply time management, requirement synthesis, and presentation best practices to your continued preparations.
- Clearly communicate solutions by creating key artifacts and diagrams.
