

Sitecore Content Hub Developer

OEM: Sitecore • Code: SITECORE_CONTENT_HUB_DEVELOPER

COURSE DESCRIPTION

The Sitecore Content Hub Developer course is designed to cover deep customizations of Content Hub at the enterprise level to enable an integration with an internal or external secured source.

AUDIENCE PROFILE

- This section doesn't contain any content.

PREREQUISITES

- Attendees must be experienced with .Net framework, C# language, Visual Studio 2022, and Dot-Net 7 current releases.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Understand the essentials of asset management within Sitecore Content Hub DAM, including daily operational tasks and best practices.
- Master the basics of Content Hub administration, enabling effective configuration and user management.
- Develop a foundational knowledge of Content Hub DAM from a developer's perspective and complete a basic knowledge assessment.
- Explore automation and integration components, learning how to use internal tools such as triggers, actions, and scripts to streamline workflow
- Integrate with external systems using developer tools like SDKs, APIs, and the CLI to extend Content Hub's capabilities.
- Implement both internal and external integrations to support advanced business processes.
- Gain hands-on experience with asset migration, including importing assets from legacy systems and transferring changes between different environments.
- Test and reinforce your understanding with a knowledge check on Content Hub Developer Operations Fundamentals.
