

Sitecore XM/XP Developer Fundamentals

OEM: Sitecore • Code: SITECORE_XM_XP_DEVELOPER_FUNDAMENTALS

COURSE DESCRIPTION

The Sitecore XM/XP Developer Fundamentals course is designed for anyone who wants to learn the basic concepts of Sitecore XM/XP 10 development. This course will give you first-hand experience developing a single site solution with Sitecore. This course is designed to help you build a simple solution from the ground up and teach you how to build templates, content scaffolding, presentation layouts, and components. Once you have completed this course, you will have the foundations for a simple, Sitecore-based website. You'll be prepared to continue your learning of advanced development features in the Sitecore XM/XP Solution Developer course.

AUDIENCE PROFILE

- This section doesn't contain any content.

PREREQUISITES

- Some knowledge of web content management software and basic HTML, CSS, and C# knowledge.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Build the data infrastructure for a Sitecore-based website.
- Create the content structure for a Sitecore-based website.
- Create presentation components for a Sitecore-based website.
