

ZTS – Introduction to Zerto

OEM: Zerto • Code: H38FVS

COURSE DESCRIPTION

The Introduction to Zerto seminar provides an overview of performing common tasks including Zerto installation and setup, understanding the Zerto UI, creating and editing Virtual Protection Groups, creating checkpoints, recovering files from a ransomware attack, and performing failovers. The seminar prepares learners for deeper follow-on training courses available from HPE globally at www.hpe.com/ww/learnstorage.

AUDIENCE PROFILE

- Customer, administrators and channel partner sales or technical sales

PREREQUISITES

- This section doesn't contain any content.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Perform common management tasks
- Understand the Zerto platform
- Create and edit Virtual Protection Groups (VPGs)
- Perform a Zerto recovery

COURSE OUTLINE

Module 1: Brief Introduction to Zerto

- What it is
- The problems solved by Zerto
- Understanding drivers to Continuous Data Protection (CDP)

Module 2: Zerto Platform

- Understanding the platform

- Introduction to Continuous Data Protection (CDP) Journal

Module 3: Architecture

- Describe on-premises: software-only, scale-out architecture
- Describe public cloud: software-only, scale-out architecture lab
- Introduce four examples of Zerto architectures

Module 4: Setup and Common Tasks

- Understand Virtual Protection Groups (VPGs)
- Understand OS and cloud components
- Employ the use case matrix
- Perform a Zerto Express Installation
- Create a Virtual Protection Group
- Navigate Zerto analytics
- Restore lost files and folders using Zerto
- Perform a failover test and move operation

Module 5: Conclusion

- Where to find information
- Where to find more Zerto training

LAB OUTLINE

- Lab Exercise #1: Install and Setup
- Lab Exercise #2: Manage and Protect
