

SAP BusinessObjects Business Intelligence Platform 2025: Administering Servers

OEM: SAP • Code: BOE520

COURSE DESCRIPTION

Learn how to administer the BI platform 2025 Servers and how they interact with each other to maintain, process, and deliver Business Intelligence content, such as Web Intelligence documents and Crystal Reports. We will explore this multi-tiered architecture deployment: Web, management, processing, and storage tiers. Extend your knowledge about key system deployment tasks, such as installation, promotion management and disaster recovery

AUDIENCE PROFILE

- Solution Architect
- System Administrator
- System Architect
- Technology Consultant
- Solution Architect
- System Administrator
- System Architect
- Technology Consultant

PREREQUISITES

Essential

- Basic networking and client/server architecture
- Basic data access knowledge

Recommended

- Course BOE510 – Administration and Security
- General familiarity with web-based solution architecture

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Explain the architecture in SAP BusinessObjects Business Intelligence Platform 2025
- Install the BI platform 2025 server and client tools

- Perform common server management and administrative tasks
- Manage and configure servers
- Maintain system oversight using the BI Admin Studio
- Implement promotion management
- Implement a disaster recovery plan

COURSE OUTLINE

Module 1: Identifying BI Platform 2025 Architecture and Terminology

- Describing the Platform Architecture
- Defining the Platform Terminology

Module 2: Identifying Installation Options

- Defining Interactive Installation
- Implementing Silent Installation

Module 3: Performing Common Server Administration Tasks

- Configuring Servers Using the Central Management Console (CMC)
- Managing Server Intelligence Agents (SIA) with the Central Configuration Manager (CCM)

Module 4: Managing Web Application Tier

- Identifying the Components of the Web Tier
- Customizing the BI Launch Pad Web Application

Module 5: Managing Central Management Server (CMS)

- Administering the CMS
- Describing the System Databases

Module 6: Managing File Repository Servers

- Administering the File Repository Servers (FRS)
- Implementing the Repository Diagnostic Tool
- Deploying the Storage Tier for High Availability

Module 7: Managing Servers in Scheduling

- Administering Job Servers
- Scheduling with Events

Module 8: Managing Adaptive Processing Server

- Administering the Adaptive Processing Server
- Implementing High Availability in the Processing Tier

Module 9: Managing Web Intelligence Services

- Administering the Web Intelligence Servers
- Navigating the Web Intelligence Process Flows

Module 10: Managing the Crystal Reports Services

- Navigate Crystal Reports process flows

Module 11: Exploring the BI Admin Studio

- Exploring BI Admin Cockpit
- Identifying Monitoring features

Module 12: Implementing Server Groups

- Evaluating Server Groups for High Availability Scenarios

Module 13: Migrating Content using Promotion Management

- Describing the Content Management Process

Module 14: Implementing a Disaster Recovery Plan

- Planning for Disaster Recovery
