

Implementing Document Management in SAP S/4HANA

OEM: SAP • Code: S41200

COURSE DESCRIPTION

Making an accurate product development you often have to store files inside your SAP System and connect them to different SAP objects. These files can have several sources. Some of them are CAD documents, or office documents, or video or audio files. With SAP Document Management System, you are able to work with document info records. These records store the files inside SAP secure areas and link them to other SAP Objects.

AUDIENCE PROFILE

- Application Consultant
- Business Process Architect
- Business Process Owner / Team Lead / Power User
- Design/Product Engineers

PREREQUISITES

Essential

- S41000 (Applying Product Engineering in SAP S/4HANA Private Cloud Edition) or comparable knowledge

Recommended

- None

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Implement and configure SAP Document Management using SAP S/4HANA

COURSE OUTLINE

Module 1

- Maintain a document info record

- Define object links to other SAP objects
- Use a status network
- Store files in secure storage areas
- Use Engineering Change Management
