

Bring AI into the Flow of Work—and the Flow of Business

Session description:

Learn how leading organizations are moving beyond AI experimentation to create human-agent teams that help employees work smarter, automate processes, and accelerate business outcomes. Discover how Microsoft 365 Copilot and Agents bring AI into the flow of work and the flow of business with the security, visibility, and control needed to scale.

This free, 60-minute, expert-led session includes practical demonstrations and a live Q&A with Microsoft experts.

In this session, you'll learn how to:

- Redefine productivity with AI that helps people work smarter, move faster, and achieve more.
- Automate complex processes and accelerate outcomes with agents grounded in your data, apps, and workflows.
- Operationalize AI and agents with full visibility, control, and a trusted security foundation.

Who should attend: Business and technology leaders, IT professionals, and AI transformation teams.

Technical Level: Intermediate (200), for attendees familiar with the topic who want practical demonstrations and expert guidance.
