

Internal Auditor Training Program on Environment Management System based on ISO 14001:2026

OEM: TÜV SÜD • Code: eg-11-14-26-0053

COURSE DESCRIPTION

This course enables participants to understand how internal audits support EMS implementation, compliance, and continual improvement. Participants will learn to assess environmental performance, evaluate risks and opportunities including climate-related aspects, verify compliance obligations, and review lifecycle-based operational controls. The training also focuses on audit techniques such as questioning skills, evidence collection, and objective evaluation through practical exercises and simulations.

AUDIENCE PROFILE

- This training is intended for:
- Top Management
- EMS Managers and Officers
- EMS Internal Auditors
- Management System Professionals and Consultants
- Personnel responsible for legal compliance
- Anyone interested in Environmental Management Systems

PREREQUISITES

- Participants should have a basic understanding of Environmental Management Systems. Familiarity with ISO 14001:2015 concepts will be an added advantage for better understanding of the updated ISO 14001:2026 requirements and audit practices.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Develop skills to plan, conduct, and report EMS internal audits
- Gain practical knowledge in identifying risks, compliance gaps, and improvements
- Enhance understanding of ISO 14001:2026 requirements and audit expectations
- Improve audit techniques including questioning, evidence gathering, and reporting
- Strengthen career opportunities in internal auditing, sustainability, and compliance roles
- Build capability to add value through effective auditing practices

COURSE OUTLINE

Module 1
