COURSE CODE

COURSE OVERVIEW

In this course, you learn about the IBM Security® Verify Access architecture and deployment options and how to position the product within your organization's landscape of security solutions. You gain skills around how to deploy Verify Access in a containerized environment or on a virtual machine. First, you improve your Verify Access administration skills by managing users, groups, and domains. Then, you set up the WebSEAL reverse proxy, including the configuration of authentication and authorization processes, protecting the object space with junctions. You also learn about other administration tasks.

WHO THIS COURSE IS FOR

- IT personnel
- System administrator
- IT Security Architect
- IT Security Deployment Specialist

LEARNING OBJECTIVES

What You Will Learn

- Explain the business context for identity and access management as well as the features and functions of IBM Security Verify Access
- Describe the component architecture
- Explain the deployment options
- Install and configure Verify Access in a containerized environment
- Understand the differences between a virtual machine or containerized deployment
- Describe the role of the Verify Access administrator

- Learn how to manage user, groups, and domains

Explain the reverse proxy concepts and capabilities:

- Understand the concept and capabilities
- Describe the authentication and authorization processes
- Explain the protected object space and how to use junctions
- Learn about administrative tasks

COURSE SYLLABUS

4 Modules, 12 Topics

01

IBM Security Verify Access introduction

TOPICS

- Understand the business context for identity and access management
- Discuss the features and functions of IBM Security Verify Access

02

Architecture and deployment

TOPICS

- Describe the components
- Understand the deployment options
- Install and configure Verify Access in a containerized environment
- Understand the differences between a virtual machine or containerized deployment

03

User, group, and domain configuration

TOPICS

- Describe the role of the Verify Access administrator
- Learn how to manage user, groups, and domains

04

Reverse proxy concepts

TOPICS

- Understand the concept and capabilities
- Describe the authentication and authorization processes
- Explain the protected object space and how to use junctions
- Learn about administrative tasks

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Delivery by certified instructors and subject matter experts
- Hands-on exercises throughout the course
- Course completion certificate from Koenig

ABOUT KOENIG

Who We Are

Established in 1993, Koenig Solutions is a globally recognised training provider with 35+ technology partnerships, 5,000+ training programmes and a network of certified instructors and subject matter experts, supporting individuals and enterprise teams worldwide.
