

Implementing Asset Management in SAP S/4HANA Cloud Private Edition

Duration: 128 Hrs

1. Exploring Business Processes in SAP S/4HANA Asset Management (S43000)

- Solutions and Deployment
- Organizational Levels
- Technical Objects
- Modeling Maintenance Processing
- Corrective Maintenance (Standard Process)
- Emergency Maintenance (Simplified Process)
- Preventive Maintenance
- Mobile Maintenance
- Analytics

2. Managing Technical Objects in SAP S/4HANA Asset Management (S43100)

- Exploring Functional Locations
- Structuring and Using Linear Asset Management
- Exploring and Using Equipment
- Structuring Bills of Material (BOM)
- Working with Serial Numbers
- Measuring Points and Counters

3. Exploring Preventive Maintenance in SAP S/4HANA Asset Management (S43200)

- Managing Task Lists
- Describing Single Cycle Maintenance Planning
- Explaining Regular Service Procurement
- Demonstrating Maintenance Planning with Time-Based Strategy
- Outlining Maintenance Planning with Performance-Based Strategy
- Reviewing Maintenance Planning with Cycles of Different Dimensions

4. Customizing in SAP S/4HANA Asset Management (S43300)

- User Interface
- Plants and Work Centers
- Notifications
- Orders
- Controlling

5. Exploring Advanced Functions in Maintenance Processing (S43400)

- Using the Phase Model
- Managing Inspection Checklists

6. Exploring Refurbishment of Spare Parts (S43410)

- Prerequisites in Materials Management
- Managing Refurbishment of Spare Parts
- Customizing Refurbishment

7. Introducing RISE with SAP Methodology for SAP Partners and Customers (SL_RISE419)

- Understanding the RISE with SAP Methodology
- Describing Clean Core
- Exploring the Benefits of Clean Core
- Diving Deep into the Different Principles of Clean Core
- Defining the Key Components of RISE with SAP Methodology
- Exploring the RISE with SAP Methodology Dashboard

8. Implementing SAP S/4HANA Cloud Private Edition (S4C03)

- Introducing SAP S/4HANA Cloud Private Edition
- Building the Implementation Team
- Defining System Landscapes
- Setting Up Systems for Implementation
- Creating Users and Defining Authorizations
- Gathering Data in Fit-to-Standard Workshops
- Validating and Configuring Business Processes
- Working with the SAP Fiori Launchpad
- Customizing Applications
- Setting Up Integrations
- Migrating Data
- Testing Configured Business Processes
