KOENIG SOLUTIONS · COURSE OUTLINE

Agile Auditing

2 Days	7	34
DURATION	MODULES	TOPICS

COURSE OVERVIEW

Internal audit and internal auditors must be agile — able to add value in a nimble way in response to disruptions and evolving risks faced by the organization. Specific agile software development methodologies and an agile mindset support innovations in the internal audit process to better enhance and protect organizational value. This is agile with a big "A"! Are you ready to help your internal audit activity become Agile? This course takes the mystery out of agility. It starts with an overview of the values and principles of Agile software development and introduces scrum – a framework which can be used to manage complexity in the internal audit engagement process. Compatibility with the International Standards for the Professional Practice of Internal Auditing (Standards) is covered to dispel common misperceptions about whether Agile auditing aligns with professional standards. With an emphasis on interaction, this course includes breakout sessions to provide participants with opportunities to actually practice Agile auditing.

WHO THIS COURSE IS FOR

- This course will provide the tools to transform your internal audit department into a more agile environment through the utilization of Agile auditing methodologies. This course will benefit chief audit executives (CAEs) and audit directors and managers who want to better understand the value of Agile auditing and learn how to implement Agile auditing methodologies. The course also is a great tool for training staff of internal audit departments that are making the transition to Agile auditing using scrum.

PREREQUISITES

- Participants should come with a basic knowledge of the internal audit process.

LEARNING OBJECTIVES

What You Will Learn

- Describe Agile auditing.
- Examine the compatibility of Agile auditing with the Standards.
- Recognize Agile software development methodologies.
- Explain the scrum process framework.
- Summarize the value of various Agile auditing iterations, including Agile Lean, Agile Lite, and Full Agile.
- Recognize change management considerations and other success factors for implementing Agile auditing.
- Construct Agile auditing artifacts.
- Perform Agile auditing ceremonies.

COURSE SYLLABUS

7 Modules, 34 Topics

01

Defining Agile Auditing

TOPICS

- Emergence of auditing with "agility."
- Agile "little a."
- Agile "big A."
- Comparing agile internal auditing to traditional internal auditing
- Compatibility with professional standards

02

Understanding Agile Software Development

TOPICS

- Waterfall development methodology
- History of agile software development
- Manifesto for agile software development: Values and principles of agile
- Relating the agile manifesto to agile auditing
- Advantages and disadvantages of agile software development

03

Scrum Process Framework

TOPICS

- Scrum overview
- Scrum roles
- Scrum artifacts
- Sprints and sprint ceremonies
- Benefits of scrum

04

Agile Auditing Iterations

TOPICS

- Agile auditing implementation iterations overview
- Agile Lean
- Agile Lite
- Full agile internal auditing

05

Deciding to Go Agile

TOPICS

- The strategic business case
- Pros and cons
- Leadership
- Change Management
- Agile auditing mindset shift
- Common Challenges
- Common benefits: the value proposition

06

Implementing Agile Auditing Using Scrum

TOPICS

- Retrofitting scrum to the internal audit activity
- Pre-planning: the treasure hunt
- Sprints: fieldwork cycles
- Reporting and wrap up

07

Practice: Mock Agile Audit

TOPICS

- Create a project canvas and project backlog
- Complete a sprint planning ceremony
- Complete a sprint review ceremony
- Complete a sprint retrospective ceremony

DELIVERY NOTE

How It Is Delivered

- Format: Online
- This course contains multiple learner engagement activities per hour, including but not limited to: polling questions, full group Q&A, small group case studies and hands-on simulations.
- CPE hours available: 16

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Delivery by certified instructors and subject matter experts
- Hands-on exercises throughout the course
- Course completion certificate from Koenig

ABOUT KOENIG

Who We Are

Established in 1993, Koenig Solutions is a globally recognised training provider with 35+ technology partnerships, 5,000+ training programmes and a network of certified instructors and subject matter experts, supporting individuals and enterprise teams worldwide.

FLEXIBLE DELIVERY
