COURSE TABLE OF CONTENTS

Cohesity NetBackup 11.0: Administration

OEM: Cohesity • Duration: 5 Days (40 hrs)

COURSE MODULES & TOPICS

Module 1: Introduction to NetBackup

- Data Protection and NetBackup Environment
- NetBackup-Powered Backup Appliances Overview
- NetBackup Integrated Solutions
- NetBackup Installation
- NetBackup Administration Interfaces

Module 2: Using the NetBackup Web UI

- NetBackup Web User Interface
- Configuring Single Sign-On
- Protecting Workload Assets
- Managing Role-based Access Control
- Alerts and Notifications
- Managing User Sessions

Module 3: NetBackup Certificate Administration

- Understanding Security Certificates
- Working with Certificate Revocation Lists
- Configuring Security Certificates
- Managing Security Certificates
- Using External Security Certificates

Module 4: Configuring Disk Storage

- NetBackup Storage Device Concepts
- Configuring BasicDisk Storage Unit
- Configuring AdvancedDisk
- Managing AdvancedDisk Storage
- Configuring Storage Unit Groups

Module 5: NetBackup Policies and Schedules

- Backup Policies Overview
- Configuring Policy Attributes
- Creating Policy Schedules
- Adding Clients to Policies
- Creating Backup Selections
- Exclude and Include Lists
- Managing Policies

Module 6: File System Protection and Restore

- Performing Manual Backup Operations
- Using and Customizing Activity Monitor
- Backup Job-related Tips

© Koenig Solutions

- Introduction to Restores
- Restore Operations Using Web UI
- User-directed Backups
- Restore Operations Using BAR Interface

Module 7: Media Server Deduplication Pool (MSDP)

- Introducing MSDP
- MSDP Architecture
- Planning a Deployment
- Provisioning Storage and Configuring MSDP

Module 8: Configuring Cloud Storage

- Using Cloud with NetBackup
- MSDP Cloud Support
- Memory-Efficient Dedup Service
- MSDP Cloud Immutable (WORM) Storage
- Image Sharing using MSDP Cloud

Module 9: Optimizing Filesystem Backups

- Filesystem Backup Challenges
- Optimizing Filesystem Backups
- NetBackup Accelerator
- NetBackup FlashBackup
- Using Multiple Data Streams
- Handling Busy Files on UNIX/Linux and Windows

Module 10: Protecting VMware Environments

- Introducing Virtual Machine Backups
- Configuring VMware Backups
- Continuous Data Protection for VMware
- Performing and Monitoring VMware Backups

Module 11: Recovering VMware Environments

- Performing VMware Restores
- Instant Access and Instant Rollback for VMware
- VMware Agentless Restores

Module 12: Backup Duplication and Replication

- Duplication Strategies
- Storage Lifecycle Policy Concepts
- Using Storage Lifecycle Policies
- Additional Storage Lifecycle Policy Features

Module 13: NetBackup Catalog Protection

- Understanding the NetBackup Catalog
- Managing Images
- Protecting the NetBackup Catalog
- Performing Catalog Recovery

Module 14: Ransomware Protection and Detection

- Ransomware Overview
- NetBackup Protection Against Ransomware
- Backup Anomaly Detection
- NetBackup Malware Scanning

Module 15: NetBackup Reporting and Analytics

- Generating Reports in NetBackup
- NetBackup IT Analytics Overview
- Generating Reports in NetBackup IT Analytics

Module 16: Upgrading and Updating NetBackup

- NetBackup Upgrades Overview
- Planning for an Upgrade
- Primary Server Upgrade Overview
- Media Server Upgrade Overview
- MSDP Upgrade for NetBackup
- Client Upgrade Overview
- Deployment with VxUpdate

Module 17: Troubleshooting and Diagnostics

- Basic NetBackup Troubleshooting
- Identifying NetBackup Processes, Services, and Daemons
- NetBackup Logging Overview
- Using Support Utilities
- Using NetBackup Support Resources

Module 18: Protecting Hyper-V Environments

- Introduction to NetBackup for Hyper-V
- Configuring Hyper-V Backups
- Configuring Policies for Hyper-V
- Performing and Monitoring Hyper-V Backups
- Performing Hyper-V Restores
- Hyper-V Restores with NetBackup Add-in for SCVMM

Module 19: Protecting NAS Data

- Introduction to NetBackup for NDMP
- Preparing for NDMP Backups
- Configuring Local NDMP Backup
- Configuring Remote NDMP Backups
- Accelerator for NDMP Filers
- Protecting NetApp cDOT NDMP Filer
- NDMP Three-way Backups
- Configuring NDMP Three-way Backups
