COURSE TABLE OF CONTENTS

Tabletop Exercises and Post-Incident Reviews

OEM: Koenig Original • Duration: 1 Day (8 hrs)

COURSE MODULES & TOPICS

Module 1: Designing Realistic Tabletop Exercises

- Defining exercise objectives, scope, and participant roles
- Crafting plausible industrial fire scenarios and progressive injects
- Preparing facility maps, resource inventories, and evaluation rubrics

Module 2: Facilitating Tabletop Simulations

- Roles of the Exercise Director, Facilitators, and Observers
- Managing time compression, injects, and player decision-making
- Evaluating command structure, communication flow, and resource allocation

Module 3: Conducting Post-Incident Reviews

- Creating a blame-free, psychologically safe learning environment
- Hot washes vs. formal After-Action Reviews (AAR)
- Reconstructing incident timelines using radio logs, telemetry, and witness accounts

Module 4: Corrective Action Planning and Continuous Improvement

- Identifying root causes, capability gaps, and systemic strengths
- Developing SMART corrective action plans and updating SOPs
- Tracking implementation and validating lessons learned in future drills
