COURSE TABLE OF CONTENTS

LangSmith Fundamentals

OEM: Koenig Original • Duration: 2 Days (16 hrs)

COURSE MODULES & TOPICS

Module 1: Introduction to LangSmith
- Overview of LangSmith
- Need for LangSmith
- Challenges in debugging LLM applications

Module 2: LLM Observability Fundamentals
- Introduction to LLM Observability
- Logging vs Monitoring vs Tracing

Module 3: LangSmith Architecture and Core Concepts
- LangSmith architecture and workflow
- Projects, Traces and Runs
- Understanding Run Hierarchy

Module 4: LangSmith Setup and Integration
- Setting up LangSmith account and API keys
- Integrating LangSmith with LangChain
- Environment variables and project configuration

Module 5: Tracing LLM Applications
- Tracing LLM calls
- Tracing sequential chains
- Understanding inputs, outputs and intermediate steps
- Tracking token usage, latency and cost
- Custom metadata, tags and run names

Module 6: Debugging with LangSmith
- Debugging LLM applications using traces

Module 7: Hands-on: Basic LLM Application Tracing
- Build and trace a basic LLM application

Module 8: Advanced Tracing Techniques
- Tracing RAG applications
- Instrumenting custom Python functions using @traceable
- Tracing document loading, chunking and embedding
- Monitoring retriever and generator components
- Debugging RAG hallucinations

Module 9: Performance Optimization and Caching
- Performance optimization and caching

© Koenig Solutions

Module 10: Tracing AI Agents and Workflows

- Tracing AI agents and tool calls
- Understanding agent execution traces

Module 11: LangGraph Integration and Workflow Tracing

- LangGraph and LangSmith integration
- Tracing LangGraph nodes and workflows
- Conditional and parallel workflow tracing

Module 12: Dataset Creation and Example Management

- Creating datasets in LangSmith
- Adding examples from traces to datasets

Module 13: LLM Application Evaluation

- LLM application evaluation
- LLM-as-a-Judge
- Custom evaluation metrics

Module 14: Prompt Experimentation and Monitoring

- Prompt experimentation and comparison
- Monitoring and alerting

Module 15: User Feedback and Collaboration

- User feedback collection
- LangSmith dashboards and collaboration

Module 16: Hands-on: RAG Application Tracing and Evaluation

- End-to-end RAG application tracing and evaluation

Module 17: Hands-on: LangGraph Agent Observability

- LangGraph agent observability
