

## Contents

### 1 Course Overview

- Course Objectives 1-2
- Target Audience 1-4
- Course Schedule 1-5
- Practice Environment Topology 1-7
- Additional Information 1-8

### 2 Introduction to OUD

- Objectives 2-2
- Identity Management Overview 2-3
- Functional Areas of Oracle Identity Management 2-4
- Products: Directory Services 2-5
- Products: Identity Governance 2-6
- Products: Access Management 2-7
- Oracle Unified Directory 2-9
- Oracle Unified Directory: Key Features 2-10
- Oracle Unified Directory: Functional Aspects 2-12
- Technical Differences: OUD and OID 2-14
- OID Compared to OUD 2-15
- Summary 2-16

### 3 Installing and Configuring OUD

- Objectives 3-2
- Hardware and Software Requirements 3-3
- Hardware Requirements 3-4
- Software Requirements 3-5
- Oracle Unified Directory Architecture 3-6
- OUD Architecture 3-7
- Oracle Unified Directory Components 3-8
- Oracle Unified Directory: Working 3-10
- Install Oracle Unified Directory Software 3-12
- Installing OUD 3-13
- Installing Oracle Unified Directory 12c: GUI Installation 3-14
- Installing Oracle Unified Directory 12c: Silent Installation 3-16
- Configure OUD Directory Server Instance 3-17

## **D100936GC20: Oracle Unified Directory 12c: Administration Ed 2 LVC**

    OU 12c Directory Server Setup and Configuration 3-18  
    Running the oud-setup Utility Without Using the Setup Wizard 3-21  
    Short-Form and Long-Form Options 3-22  
    Using Ports 389 and 636 for LDAP Connections 3-23  
    Install Oracle Unified Directory Services Manager 3-25  
    Oracle Unified Directory Services Manager (OUDSM): Overview 3-26  
    Prerequisite Software to Run OUDSM on WLS 3-27  
    Configuring a WLS Domain for OUDSM 3-28  
    Using OUDSM to Access Multiple OU Instances 3-29  
    Uninstall Oracle Unified Directory 3-30  
    Uninstalling Oracle Unified Directory 3-31  
    Uninstalling Oracle Unified Directory Server Instances 3-32  
    Uninstalling the OU 12c Software 3-33  
    Summary 3-34

### **4 OUD: Basic Administration**

    Objectives 4-2  
    OU Tools and Controlling OU Instance 4-3  
    OU Administration Tools 4-4  
    Starting and Stopping Directory Servers on Linux and UNIX Systems 4-5  
    Enabling and Disabling Directory Servers as Microsoft Windows Services 4-6  
    Manage OU Data 4-7  
    Importing Data 4-8  
    Importing Partial Data 4-10  
    Exporting Data 4-11  
    Exporting Partial Data 4-12  
    LDAP Client Tools 4-13  
    Managing Entries: LDAP Commands 4-14  
    Managing Entries: OUDSM 4-15  
    Indexing: Overview 4-16  
    Determining Whether a Search Is Indexed 4-18  
    Indexing Directory Data 4-19  
    Work with OU Data Attributes 4-20  
    Unique Attribute Plug-In 4-21  
    Configuring the Unique Attribute Plug-In 4-22  
    Virtual Attributes 4-23  
    Creating Virtual Attributes 4-24  
    Configure Referrals 4-25  
    Referrals 4-26  
    Configuring the Referral List Manually 4-27  
    Smart Referrals 4-28

## **D100936GC20: Oracle Unified Directory 12c: Administration Ed 2 LVC**

- Manage OUD Users and Groups 4-30
- Managing User Accounts 4-31
- Managing User Passwords 4-32
- Root Users 4-33
- Managing Root Users 4-34
- Groups 4-36
- Static Groups 4-38
- Dynamic Groups 4-40
- Virtual Static Groups 4-41
- Nested Groups 4-42
- Referential Integrity Plug-In 4-43
- Manage OUD LDAP Schema 4-45
- Directory Schema 4-46
- Extending Schema 4-47
- Managing Attribute Types 4-48
- Managing Object Classes 4-50
- Viewing Syntaxes and Matching Rules 4-52
- Quiz 4-53
- Summary 4-56

### **5 OUD Monitoring and Logging**

- Objectives 5-2
- Monitoring Overview 5-3
- Monitoring 5-4
- Monitoring: Overview 5-5
- Manage Monitor Providers 5-6
- Manage Alert Handlers 5-8
- Alert Handlers 5-9
- Managing Alert Handlers: dsconfig 5-10
- Creating an Email Alert Handler: dsconfig 5-11
- Managing Alert Handlers: OUDSM 5-12
- View Monitoring Data in cn=monitor 5-13
- Monitoring Using the cn=monitor Subtree 5-14
- Monitoring Using the cn=monitor Entry: Example 5-15
- Logging Overview 5-16
- Logging 5-17
- Log Files: Overview 5-18
- Log File Format: Standard Versus ODL 5-19
- OUD Log Files 5-20
- Manage Logging Providers 5-22
- Enabling OUD Logging in OUDSM 5-23

Enabling OUD Logging by Using CLI 5-24  
Viewing OUD Logging Status by Using CLI 5-27  
OUD Logging Status Output 5-28  
Viewing OUD Log Files 5-29  
Log Files Retention and Rotation Policy Example: Audit Logger 5-30  
Logging: Audit Example 5-31  
Logging: Access Example 5-32  
Logging: Debug Example 5-33  
Logging: Errors Example 5-34  
Summary 5-35

## **6 OUD Security**

Objectives 6-2  
Access Control Model 6-3  
Access Control 6-4  
Access Control: Overview 6-5  
ACI Structure 6-6  
Access Control Instruction 6-7  
ACI Evaluation 6-8  
ACI Structure 6-9  
ACI Syntax for Targets and Bind Rules 6-10  
ACI Syntax Example 6-12  
Securing and Controlling Access to Directory Data 6-13  
Managing Global ACIs: Overview 6-14  
Managing Global ACIs 6-15  
Managing Non-Global ACIs 6-16  
Adding and Removing a Non-Global ACI 6-17  
Managing ACIs with OUDSM 6-18  
Password Policies 6-19  
Password Policies: Fundamentals 6-22  
Configuring Password Policies with dsconfig 6-23  
Creating a New Password Policy 6-24  
Password Policy as an LDAP Subentry 6-25  
Defining Password Policy as an LDAP Subentry 6-26  
Configuring Password Policies by Using OUDSM 6-27  
Password Validators and Password Generators 6-28  
Password Validators 6-29  
Managing Password Validators 6-30  
Password Generators 6-31  
Enabling Secure LDAP Connectivity 6-32  
Prepare OUD SSL Artifacts 6-33

Configure and Test OUD LDAPS Connection Handler 6-34  
Configuring SSL for OUD 6-35  
Attribute Encryption 6-39  
Attribute Encryption: Fundamentals 6-41  
Attribute Encryption: Configuration Parameters 6-42  
Summary 6-43

## **7 Deploying OUD Replication Topology**

Objectives 7-2  
OUD Replication Topologies 7-3  
Replication Topology 7-4  
Servers in a Replication Topology 7-5  
Single Data Center, Two Directory Servers, Two Replication Servers 7-7  
Single Data Center, Five Directory Servers, Two Replication Servers 7-8  
Two Data Centers, Four Directory Servers, Four Replication Servers 7-9  
Enabling and Initializing OUD Replication Servers 7-10  
Enabling Replication: oud-setup 7-11  
Defining the Global Administrator 7-13  
Specifying Base DNs 7-14  
Enabling Replication: dsreplication enable 7-15  
Initializing Directory Data for Replicas: oud-setup 7-17  
Initializing Directory Data for Replicas: dsreplication 7-18  
Initializing Directory Data for Replicas: backup and restore 7-20  
Initializing Configuration Data for Replicated Servers 7-22  
Modifying Existing Replication Configuration 7-24  
Retrieving the Replication Domain Name 7-25  
Configuring Replication Groups 7-26  
Configuring Replication Groups: Example 7-27  
Configuring Assured, Fractional, and Isolated Replication 7-28  
Replication: Loose Consistency Model 7-29  
Assured Replication: Providing Tighter Consistency 7-30  
Configuring Assured Replication: Safe Data Mode 7-31  
Configuring Assured Replication: Safe Read Mode 7-32  
Fractional Replication 7-33  
Configuring Fractional Replication 7-34  
Isolated Replication 7-35  
Configuring Isolated Replication 7-37  
Testing and Tuning Replication 7-38  
Determining Replication Status 7-39  
Verifying Replication Success 7-41  
Tuning Replication 7-42

## **D100936GC20: Oracle Unified Directory 12c: Administration Ed 2 LVC**

Using OUDSM to Configure Replication 7-44  
Using OUDSM to Configure Data Replication 7-45  
Manage Configuration of an Existing Replication Server 7-46  
Manage Configuration for a Replicated Suffix 7-47  
Replication Configuration Wizard 7-48  
Creating a New Topology 7-50  
Managing an Existing Replication Topology 7-51  
Quiz 7-53  
Summary 7-56

### **8 Oracle Directory Integration Platform**

Objectives 8-2  
DIP Overview and Architecture 8-3  
Oracle Directory Integration Platform: Overview 8-4  
Synchronization 8-5  
Provisioning 8-6  
DIP Architecture 8-7  
DIP Synchronization Service 8-8  
Synchronization Service: Operations 8-9  
Connectors 8-11  
Directory Synchronization Profiles 8-12  
Default Synchronization Profiles 8-14  
Synchronization Agent 8-15  
DIP Installation and Configuration 8-16  
Administering Directory Integration Platform 8-18  
Command-Line Tools for Administering DIP 8-19  
Using FMW Control to Administer and Monitor DIP 8-20  
Starting and Stopping DIP 8-21  
Viewing DIP Status 8-22  
Viewing DIP Registration Information 8-23  
Oracle Directory Integration Platform Server Configuration 8-24  
Viewing DIP Logs 8-26  
DIP Security Features 8-27  
SSL and DIP 8-28  
Credential Store 8-29  
Configuring DIP for SSL Mode 2 8-30  
Integration Profile Authentication 8-32  
Access Control for DIP Server and Profiles 8-33  
Troubleshooting DIP 8-35  
DIP Tester 8-37

Quiz 8-39

Summary 8-42

## **9 Synchronizing Directory Data with OUD**

Objectives 9-2

When to Use Oracle Directory Integration Platform 9-3

Benefits of Using DIP with OUD 9-4

Software Requirements for Running DIP 9-5

Oracle Directory Integration Platform Typical Topologies 9-6

Configuring OUD as the DIP Back-End Directory 9-7

Configuring OUD as the DIP Back End: Prerequisites 9-8

Creating a WebLogic Domain to Configure DIP 9-10

Configuring OUD as the DIP Back End: dipConfigurator 9-11

dipConfigurator: ACIs 9-12

Synchronizing OUD as Back-End Directory with OID 9-13

Synchronizing OUD and OID 9-14

Synchronization Profiles 9-15

Synchronization Profiles: General 9-16

Synchronization Profiles: Mapping 9-18

Mapping Rules 9-19

Domain and Attribute Mapping Rule Format 9-20

Example Domain Rules: 9-22

Attribute Rules 9-23

Synchronization Profiles: Filtering 9-24

Matching Filters 9-25

Synchronization Profiles: Advanced 9-27

Deregistering a Profile in FMW Control 9-29

Bootstrapping Data into the Oracle Back-End Directory 9-30

Synchronizing OUD as Back-End Directory with MS Active Directory 9-32

Synchronizing from AD to OUD 9-33

OUD Schema Elements for AD 9-35

Synchronizing OUD and AD 9-36

Summary 9-37

## **10 OUD Proxy Servers**

Objectives 10-2

OUD Proxy Mode Capabilities and Request Routing 10-3

OUD 12c Proxy Server 10-4

Request Routing on OUD 12c Proxy Servers 10-5

Request Routing on OUD 12c Directory Servers 10-7

Request Routing Configuration Object Creation 10-8

## **D100936GC20: Oracle Unified Directory 12c: Administration Ed 2 LVC**

Proxy Server Load-Balancing Model	10-10
OID 12c Proxy Server Load Balancing	10-11
OID 12c Proxy Server Proportional Load Balancing	10-14
OID 12c Proxy Server Saturation Load Balancing	10-15
OID 12c Proxy Server Optimal Load Balancing	10-17
OID 12c Proxy Server Search Filter Load Balancing	10-18
Proxy Server Data Distribution Model	10-19
OID 12c Proxy Server Data Distribution	10-20
OID 12c Proxy Server Numeric Data Distribution	10-21
OID 12c Proxy Server Lexico Data Distribution	10-22
OID 12c Proxy Server Capacity Data Distribution	10-23
OID 12c Proxy Server DN Pattern Data Distribution	10-25
Global Index Catalog	10-26
OID 12c Proxy Server Setup	10-27
Setting Up an OID 12c Proxy Server	10-28
Configure a New Proxy Server	10-29
Selecting Load Balancing or Data Distribution as the Proxy Type	10-30
Adding Back-End LDAP Servers for Load Balancing	10-31
Defining Load Balancing Algorithm and Server Weights	10-32
Selecting the Number of Data Distribution LDAP Servers	10-33
Specifying How the Proxy Server Distributes Data	10-34
Defining Global Index Catalog	10-35
Configure OID 12c Proxy in OUDSM	10-36
Configuring OID 12c Proxy in OUDSM	10-37
OUDSM Core Configuration	10-38
Testing OID Proxies	10-39
Testing Load Balancing	10-40
Testing Data Distribution	10-42
Quiz	10-43
Summary	10-45

### **11 OUD Plug-ins and Extensibility Framework**

Objectives	11-2
Need for Plug-ins and OUD RDBMS Workflow Element	11-3
Need for Plug-Ins	11-4
RDBMS Workflow Element	11-5
RDBMS Workflow Element: Use Cases	11-6
RDBMS Workflow Element: Features	11-7
OID Plug-in: Overview	11-8
OID Plug-Ins	11-9
OID Plug-Ins: Life Cycle	11-10

OID Plug-Ins: Use Cases 11-11  
Introduction to OID Plug-in API 11-12  
OID Plug-ins: Implementation Points 11-13  
OID Plug-in API: Overview 11-14  
Deploying a Sample Plug-In 11-15  
Quiz 11-17  
Summary 11-19

## **12 Virtualizing OID**

Objectives 12-2  
Pass-Through Authentication Capabilities 12-3  
Pass-Through Authentication Mechanism 12-4  
Pass-Through Authentication Workflow Element: Features 12-5  
Pass-Through Authentication Configuration Model 12-6  
Configuring Pass-Through Authentication 12-7  
OID Virtualization Mechanism 12-9  
Difference Between Join and Distribution 12-10  
Join Workflow Element 12-11  
Features of the Join Workflow Element 12-12  
ForkJoin Workflow Element 12-13  
Configuring Virtualization 12-14  
Join Participants 12-15  
Using Join Workflow Element for Pass-Through Authentication 12-16  
DN Renaming Workflow Element 12-17  
DN Renaming: Example 12-18  
RDN Changing 12-19  
RDN Changing Workflow Element Definition Example 12-20  
Optimizing Virtualization Search Results 12-21  
Optimizing Virtual Search Results 12-22  
Summary 12-23

## **13 Integrating OID with Enterprise User Security**

Objectives 13-2  
Database Management 13-3  
Database Management: Traditional Problems 13-4  
Database Management: An OID Solution 13-5  
Enterprise User Security (EUS) 13-6  
Enterprise User Security: Overview 13-7  
Benefits of EUS 13-8  
Integrating EUS and OID 13-9  
When to Integrate EUS and OID 13-10

## **D100936GC20: Oracle Unified Directory 12c: Administration Ed 2 LVC**

Database Accounts Stored in OUD	13-11
Configuring EUS with OUD	13-12
Configuring EUS with OUD: High-Level Tasks	13-13
OID Setup and Configuration for EUS	13-14
Set Up OUD Instance for EUS Integration	13-15
Update modifyRealm.Idif File and Load into OUD	13-16
Update java.security File and Restart OUD Instance	13-17
Prepare Oracle Database for EUS	13-18
View and Copy OUD Keystore Passphrase	13-19
Get OUD Keystore Passphrase from keystore.pin File	13-20
Export OUD Self-Signed SSL Certificate	13-21
Add Exported OUD SSL Certificate to Database Wallet	13-22
Configure DB Listener for Directory Connectivity	13-23
Enable Oracle Database Directory Server Use	13-24
Configure OUD Password Management for EUS Administration	13-25
Configure Pluggable Database for EUS Integration	13-26
Verify PDB Entries in OUD	13-27
Log In to Pluggable Database and Add PDB Users	13-28
Create User-to-Schema Mapping in OUD	13-29
Test User Log In to Pluggable Database	13-33
EUS with OUD Proxy and Active Directory PTA	13-34
OID Proxy Forwards Database Accounts to External Directory	13-35
Accounts in Active Directory: Password-Based Authentication	13-36
Accounts in Active Directory: Kerberos Authentication	13-37
Integrating OUD, EUS, and AD for Password Authentication	13-38
Quiz	13-41
Summary	13-44

### **A Coexistence Topology: OUD and ODSEE**

Objectives	A-2
Defining Coexistence Topology and Potential Issues	A-3
Coexistence Topology	A-4
Update Initiated from ODSEE 11g – Data Modification Flow	A-6
Update Initiated from the OUD 12c – Data Modification Flow	A-7
Coexistence Topology Use Case – Starting State	A-8
Coexistence Topology Use Case – Intermediate State	A-9
Coexistence Topology Use Case – Upgrade Complete	A-10
Defining Coexistence Topology and Potential Issues	A-11
Coexistence Topology – Potential Issues	A-12
ODSEE 11g Configuration: Password Policy and Account Lockout	A-13
ODSEE 11g Configuration: Roles and Class of Service	A-16

## **D100936GC20: Oracle Unified Directory 12c: Administration Ed 2 LVC**

ODSEE 11g Configuration: Plug-ins and Indexes	A-18
Analyzing Your ODSEE 11g Configuration: Schema	A-20
ODSEE 11g Configuration: ACIs	A-22
Running the ds2oud Utility in Diagnostic Mode	A-23
Resolving Coexistence Issues	A-25
Configure OUD 12c for Coexistence Topology with ODSEE 11g	A-28
Deploy OUD 12c for Coexistence with ODSEE 11g	A-29
Set up OUD 12c Directory Servers in a Coexistence Topology	A-30
Run ds2oud –a to Initialize the OUD 12c Directory Servers	A-31
Enable Replication for OUD 12c Directory Servers	A-32
Deploying OUD 12c Replication Gateways	A-33
Creating OUD 12c Replication Gateway Instance	A-34
Define Replication Gateway Administration Properties	A-35
Configure Replication Gateway ODSEE 11g Server Settings	A-36
Configure Replication Gateway OUD 12c Server Settings	A-37
Review and Complete Replication Gateway Configuration	A-38
Populating OUD 12c Directory Servers with ODSEE 11g Data	A-39
Exporting ODSEE 11g Directory Data	A-40
Initializing the OUD 12c Directory Servers with Directory Data	A-41
Test Directory Data Replication in Coexistence Topology	A-42
Testing the Coexistence Topology	A-43
Monitoring the Replication Gateway	A-44
Completing Upgrade to OUD 12c	A-46
Upgrade Completion Activities	A-47
Upgrade from ODSEE 11g to OUD 12c Completed	A-48
Summary	A-49
Quiz	A-50

**D100936GC20: Oracle Unified Directory 12c: Administration Ed 2 LVC**
