

Open Source Introduction (LFC202)

In this module, you will learn the basic components of open source and open standards. You will also learn about the differences between open source and closed source software, the reasons for the use of each, and how the combination of standards and open source provides increased value to an organization.

Duration: 2 Hours

Prerequisites for this course

In order to complete this course, learners should be able to:

- Basic understanding of software development/business concepts.
